Dear Doctor Berry:

I have successfully done ninety-three gastroscopies since your course but did not keep a record of those which I did not consider completely satisfactory or in which I was unable to pass the scope into the stomach. I have no idea of the number of unsuccessful attempts I may have made. I have another examination scheduled for tomarrow which should prove to be an interesting examination by history and x-ray findings at least.

Hoping this is the information you desire.

Sincerely,

H. M. Wikoff, M. D.

HMW/rh

Best personal regards
