

Aug. 19, 1974

Dear Lee,

Heri and I received our copy of "Gastrointestinal Pan-Endoscopy". Naturally we think it is great. I think I need a medical dictionary. (smiles) I've read the preface. I feel as if I knew Dr. Schindler. I clearly remember when you studied under him. Since this book is a text, wouldn't it be in the medical libraries throughout the country and even the world? I note that six of the contributors received their basic training in endoscopy under you. Your friendships and experience with these renowned medics in the field of gastroenterology and gastroscopy

is magnificent. We are so proud of you. Mom and Dad would be so proud. Do you think that at any time all international contributors would get together for a conference? A representation from four continents and ten countries would be a great celebration.

The introduction is interesting. I read through the acknowledgments carefully to see if I recognized anyone, and I did our sister Em.

As time goes on I shall try to understand more of this great book. I am especially interested in knowing the history of Gastrointestinal Endoscopy.

Congratulations to our eldest brother. I shall cherish my copy and am proud that you sent

it to me.

Love and best wishes
your sister,
Gladys
