19 November 1946

Dear Doctor Berry,

Thank you for the notice of the Medical Department conference at which "Multiple Myeloma" will be the subject. It just came.

I cannot be present. I regret to say, as I have to take part in the Clinicopathological Conference at the Presbyterian that day, and the hours conflict.

I shall hope to see you again before long. Your problems are in my mind a good deal. What was the reaction to my "report"? What can we do that will be more effective in attaining what you want?

Yours sincerely,
Evan M. Barton
