Dr. Joel Valencia Parparcen,
Gastroenterology Department,
Faculty of Medicine,
Central University,
Caracas, Venezuela.

when answering Put in Spanish,

Dear Dr. Parparcen:

We received your photography for which we wish to thank you. I am enclosing a copy of the pamphlet announcing our book. It will contain about 450 pages including 128 color plates. Under separate cover I am also forwarding to you a copy of the final ~~version~~ *chapter* of your chapter. I hope you will agree with our rather extensive editing of this chapter. It was necessary to do so in order to fit into the total ~~scheme~~ *structure* of the book and in order to meet our strict requirements for space and illustrations, I think you will like the book. There were many favorable comments at the May meeting of A.S.G.E. and there is already quite a demand for the book. We expect it to come off the press in about three months. Meanwhile, I wanted you to see the revision of your chapter and ask you to send a letter of approval. If this is done, we will not send you the galley sheets for the correction of English. I will do that for you and I am sure that will save you a lot of trouble and important time for the publication.

Recently, my brother and his wife visited Caracas. I asked them to look you up, just to say hello and to tell you that the book is coming along nicely. I trust that you and your family are in the very best of health. I look forward to hearing from you at your earliest convenience and to see you before too long. Thanking you again for your cooperation, I remain,

Very truly yours,

Leonidas H. Berry, M.D.
Chief, G.I. Endoscopy Clinic
