

Established And Innovative proposals for extension of Health Care in Cairo and Alexander County =

The medical profession has boasted for many years that medical care in America has been among the best of all the countries in world. This boast has been based upon 2 rather petitious contentions - ^{no 1.} that in American medicine there ^{is called} is free enterprise, and number 2 that the ratio

~~Dr to increment of population as~~

and presumably if you have the mentality to solve an algebraic equation or decipher an organic chemical formula, that all one needs to get into medicine and to advance after graduation is to willing to work. This has been one of the boldest misrepresentations of the truth that ever came out of the hodgepodge of American Democracy. The real bit of fiction is that America being a vol. of doctors in proportion population. Rankings as 2nd or 3rd among countries in the world.
