Leonidas H. Berry, M.D.
National Medical Association
412 E. 47th Street No. 26
Chicago, Illinois 60653

Dear Dr. Berry:

Your letter to the Registrar, concerning Samuel B. Angura, has been turned over to me for answer because I probably know him better than any one else on campus. I had Sam in my classes in biology, I came to know him socially, and I spent a lot of time counselling him while he was here.

He is a graduate of the College in the class of 1965. His record academically is summarized below:

Degree - Bachelor of Arts

Rank - Rite

Academic average - 1.015 (3.00 is perfect)

Standing in class - 177/188

Major - Biology (he started as a pre-medical student but gave it up).

So far as I know he was never accepted by a medical school.

On academic probation - two times

Obviously, Sam was not a good student while here but was graduated legitimately.

Personally he is a very likeable young man and his reputation on campus was of the best. He made a great many friends and his behavior was exemplary and his integrity was never questioned.

I hope that this information will be of value to you and I will be glad to supply additional data, if it is desired.

Sincerely

Homer C. Porter
