*Summary - AMA  
Liaison*

Dr. Leonidas H. Berry, President  
National Medical Association Inc.  
412 East 47th Street No. 26  
Chicago, Illinois 60655

Dear Dr. Berry:

It was a pleasure indeed to have served with you as a member of the Liaison Committee meeting with the Board of American Medical Association. Although one can not immediately pinpoint what definite benefits accrue from such meetings, it is always good to exchange ideas and to view our problems and those of others at close range.

I got the impression from talking with several members of the American Medical Association present, that they were in full accord with the spirit and letter of Title VI and would work diligently toward its implementation.

It is my opinion, therefore, these meetings are worthwhile and they do accomplish much. I'm inclosing herewith Curriculum Viti of Doctors Daniel T. Rolfe and Matthew Walker for your referral in answer to the request of the American Medical Association for such names. The appointment of these physicians and or others from our association to committees of the American Medical Association would certainly be a step in the right direction and would work for the benefit of both associations.

I do hope for you a continue successful reign as our President.

Yours truly,

*William H. Grant M.D.*

William H. Grant M.D.
