Dear Charlie:

I happen to have run across another one of your periodic form letters to your patients stating as how you are cutting down, etc. and etc, and etc. Now, you have advised me a few times along these lines and I am glad to note you practice what you preach. I am doing pretty well to carry out your admonitions. I hope to finish up my research effort in the next 10 months and then I will fold my book of medical curiosity permanently. I will gradually cut down and I have some other things which I will write to you about later, if and when they develop.

I ran across a Rush Medical College Graduate ^{inst} Program which has in it a rather full roster of faculty. If you did not find the name of the gentleman for whom you were searching and if you will again give the title and department if indeed it is still appropo, I will see what I can do and send it to you at once.

Hope you are fine and that your literary activities haven't knocked you out too much. Sincerest regards to Lillums and you.

"Charlie"

Leonidas
