Dear Doctor Berry:

Thank you so very much for the very interesting publications. Congratulations on your wonderful accomplishments. As we say in the art world, "Have you been working!!"

It seems it was yesterday when you tested those unfortunate alcoholic men who waited for you on the Clinic steps. The beginnings of the true "Research man". I am very proud to know you. You may not know that while

I was at Providence, I not only started the Admitting Office, but also the Credit Department - the Credit Department with two Clerks in the Library. But, as soon as it was successful (I had even talked Insurance Companies into honoring old claims) it was taken from me! Jealousy is horrid!!

All of my Saturdays were spent at the Art Institute, and most of the evenings at Roosevelt U. I always drew, my mother taught me. She was an artist, also a poetess. Perhaps you will take a "breather" and come to my next exhibit.

My vacation is next week - I'm going to San Francisco. Can't wait.

By the way, I work for the City - Building Department, Demolition section  
744-3432. if you ever need anything -

Madeline
