

Heinkel

January 26, 1976

Prof. Dr. Klaus Heinkel
Arztlicher Direktor Der Medizinischen
Des Krankenhauses Bad Cannstatt
7 Stuttgart 50 (BAD Cannstatt)
Priebnitz weg 24
Stuttgart, Germany

Dear Doctor Heinkel:

I must write you again regarding your promise to write a 5000 word monograph on the Clinical Significance Gastroduodenoscopy - I mentioned that I would write the first general treatise, The Clinical Significance of G.I. Endoscopy - This is in press and the second monograph (Esophagoscopy) is being processed by our sponsors. Yours is next we really should have it in hand now. I am enclosing a copy of my monograph as a general guide. Please include case histories add 6 or 8 good color slides, a black and white bust photograph, (head, shoulders and chest) and a short curriculum vitae of not more than 10 to 15 lines. Remember there should be about 10 or 12 references because our monographs are meant to be a sequel. One or more of your reference should refer to this book. *"G.I. Perendoscopy"* As mentioned before after each of 6 monographs are released it is hoped that all of them can be put together in a single book. Please tell me by return mail how soon we can expect the completion of your manuscript. Please keep a complete copy in final form in your files and mail the original to me at your earliest convenience. The honorarium will be forthcoming; ^{as} as soon as my edited copy is sent to the Roche Company. As previously mentioned before, the publications are being enclosed under the Continuing Education Program of Roch and Co. and will not be associated with advertisements.

Hope you and family are well and I hope I will hear from you promptly.

Sincerely,

Leonidas H. Berry, M.D.
