

April 26, 1956

Dr. Park Huffman  
701 State Street  
South Whitley, Ind.

Dear Dr. Huffman:

The proprietary name of the drug we used in our studies is ROBALATE. It comes in tablet form and is manufactured by the A.H. Robins Co., Richmond, Virginia. We found that 2 tablets chewed 2 hours after meals and at bedtime, or in some cases every 2 hours, were satisfactory in adequately neutralizing gastric acidity and promoting ulcer healing.

Yours very truly,

Leonidas H. Berry, M.D.
