Dear Leonidas:

I was delighted to get your letter commenting on my own changes and sending me the brochure on your new book. It surely sounds like a monumental work.

We have had a delightful year at the University of Virginia and now are about to move to Florida. I have accepted the Presidency of the University of Florida and will take over full-time the first of August. It is moving into a new arena but one that Ann and I have become increasingly excited about as we become involved in the issues of higher education.

Ann sends her best regards.

Sincerely yours,

Robert Q. Marston, M. D.
