April 26, 1971

Dr. Francis Owens  
Cleveland Clinic  
Cleveland, Ohio

Dear Dr. Owens:

It is the spring of the year and I was just thinking about beautiful Ohio, or perhaps an old-time waltz by that name and you came to mind. How are you? I certainly hope you are fine and that your work is going well.

I don't believe that you have been at the Endoscopy meetings for the last couple of years. Are you still doing anything in the field of gastro-biopsy and have you discarded the Berry Biopsy assembly for the fiberoptic techniques which most of us have done? I have enjoyed your papers in the past even when you were not talking about me. Have you published anything recently in gastro-biopsy, or are you still working in that field or related areas with fiberoptics?

Hope you are fine and that I may see you before too long at one of the meetings.

Sincerest regards and best wishes,

Leonidas H. Berry, M.D.
