March 14, 1962

Dear Dr. Berry,

This is a very hurried letter to get this material off to you; I hope that the enclosed meets with your approval. I hope that you can send it out right away **AIR MAIL** and I would very much appreciate it if you will be good enough to send me a copy.

I have included excerpts because rightfully you might want to be re-freshened on specific details. Everything is accurate. Moreover, the original of all documents have been presented to the Department here. What I have included here represents the kinds of detail that they have requested of me. Hope you approve, if there is any question please call me collect.

In my discussion of so many things on the telephone, I forgot to mention that when I was in Chicago this last time I went in and saw the new Dean. You, as ⁺, may be surprised to learn that after all these years the U. of Chicago has expressed willingness to reverse themselves and ⁺ did not tell them about the Paris degree. They know that they were wrong.

With reference to the name for source material on the research that you are doing, I will compile a list and send on to you. You will get it not later than Tuesday next.

Very many thanks and it was more than a pleasure to talk with you and to learn that you are doing so well. I had read with deep interest a report on your work in Jet last year.

Be good and my very best regards.

Cordially,

Argyle Stoute
