Mr. Carl F. Henkel  
Optical Glass Department  
Corning Glass Works  
Corning, New York

Dear Mr. Henkel:

Following our recent telephone conversation your catalogs were received. Conference with the General Electric miniature bulb engineer indicates that the glass we probably need is as follows:

2 pieces 2 inches square of the following:

#5840 - 80% transmission

#5850 - 50% transmission of ultra violet filter

Please send same to the above address and I will authorize immediate payment from our research fund.

Thanks for your cooperation.

Yours very truly,

Leonidas H. Berry, M.D.

LHB/va
