Complimentary
Note
to Leevy*

Dear Doctor Berry:

The Lilly Research Laboratories are pleased to send to you, with their compliments, the first Lilly medical monograph, Evaluation of Liver Function in Clinical Practice. Prepared by Carroll M. Leevy, M.D., F.A.C.P., Professor of Medicine, New Jersey College of Medicine and Dentistry, with the help of editorial consultants, Charles S. Davidson, M.D., F.A.C.P., and Hans Popper, M.D., F.A.C.P., the booklet is a unique compilation of new and important developments in the diagnosis and evaluation of hepatic disorders.

We think the monograph should prove interesting as well as informative and practical, and we believe that you, as a member of the American College of Physicians, will find it useful in your work.

We like to think of Eli Lilly and Company as an important auxiliary to the clinician. The monograph is perhaps a reflection of this concept. We, therefore, would appreciate any comments or suggestions you may care to make, either directly or through your Lilly sales representative.

Sincerely,

ELI LILLY AND COMPANY

S. O. Waife
