Dr. Carroll Leevy
New Jersey Medical Center
School of Medicine
Department of Gastroenterology
Jersey City, New Jersey

Dear Doctor Leevy:

Sometime ago I was informed that the big municipal hospital there was operated on a basis whereby indigent and non-indigent patients were treated side-by-side without one patient's knowledge as to whether the other was paying directly (privately) or indirectly.

Would you please inform me whether this is substantially true at the present time, and may I ask that you request your administrator to send me further details on this type of procedure. I need it with reference to my obligations and responsibilities in this general field.

Hope you are doing fine. I appreciate this courtesy.

Very truly yours,

Leonidas H. Berry, M.D.
