AIR MAIL

Dr. Leonidas H. Berry
412 E. 47th Street
Chicago, Illinois

Dear Dr. Berry:

Mr. Bicknell of Metro Tec Scope Makers has given me your name as one of several people using the Tomenius gastric biopsy instrument following my request for information about it.

We are using two gastroscopes, one of which is the Metro Tec Schindler scope which can be converted for biopsy purposes. Before having this done however, I am interested in the opinions of people who have used the instrument, particularly in regard to the technic of use, yield of specimen, ability to manipulate the biopsy attachment to the desired area and any other problems relating to its use.

I would appreciate very much your letting me know your opinions on these matters since it will help me in making a decision as to whether or not the instrument would serve our purposes here.

Thank you very much.

Sincerely,

Leonard Molofsky M.D.
Leonard Molofsky, M.D.
