

Dear Delegate:

As Medical Director of the A.M.E. Health Commission, we were glad that you and nearly a thousand others went through the mobile unit which our Commission placed at your disposal at the General Conference in Philadelphia.

There is evidence that there may or may not be an important lesion in your chest. We have not received the name of your physician to whom we could send this report. Please send such name as soon as possible, but in addition to this, go to your doctor and have another checkup because you may have a serious lesion in your chest. We are glad that we were able, with the cooperation of the Philadelphia-Montgomery Tuberculosis Association, to bring to our delegates and visitors this type of service.

Best wishes for your continued health, I am

Very truly yours,

Leonidas H. Berry, M.D.
Medical Director
