THE HOME ALMANAC
1858
PUBLISHED BY
SETH W. FOWLE & CO.
BOSTON
PROPRIETORS OF WISTARS BALSAZ
WILD CHERRY AND GREEN'S
OXYGENATED BITTERS.
When men knew no almanac but the changes of the moon, the writing or publishing of this kind of Annuals was unknown; but since the idea of lunacy has generally vanished through the introduction of other modes of calculating time than lunar changes, the printed almanac has become as indispensable to circulate that knowledge which annihilates disease by scattering broadcast the proper remedies, as the knowledge of astronomy has demonstrated to us the importance of the sun above that of the moon. A large portion of our growth, in health and disease, depends on our knowledge of the sun and its diurnal and annual course.

With the return of the year, then, the sick, who have long been benefited by our Remedies, will demand our Almanac; and our wish to restore them from sickness to Health, from misery to Happiness, leads us cheerfully to respond to that demand.

Our Remedies have been so long before the public, and their high value and their unrivalled success have rendered them so well known and generally appreciated that we need say but a few words of them in this place. It is only the good coin that is imitated; only the flimsy fabric that requires praise; so it is that the worthless compound or the gilded pill of the empiric must depend upon the unmerited commendation of its interested friends for its success. Not so with "Wistar's Balmain of Wild Cherry," or the "Oxymotator Bitters," which we furnish. They have stood the test of time. They have lived and been sought after by every family conveyed to new life and vigor into the worn down, diseased, and rotting bodies and jaded minds of vast multitudes, while the vaunted quick species have risen in a day, and perished in a night, like the "angry prophet's gourd."

So it ever is; so it ever will be; every thing finds its proper level. The Medicine which is good will be esteemed and sought, while that which is worthless will soon be among the things "lost upon earth," and buried in oblivion. Where true Medical Science has been engaged, first in ascertaining the nature of disease; and, secondly, the character and property of the true remedies; and when great Pharmaceutical skill has been exercised in combining various remedies according to the latest and true discoveries of chemistry, so that, instead of neutralizing each other, (as they are often made to do with the ignorant and unskillful,) they harmonize and cooperate together, each aiding its fellow in removing disease, their permanent and lasting success will follow.

Hence it is that we continue, year after year, to supply the constantly increasing demand for these wonderful Medicines; and hence, also, the numerous Certificates, which, voluntary and unsolicited, pour in upon us,—a few of which we publish,—attesting the remarkable cures performed by these Remedies, from all portions of our fellow-countrymen, from the halls of Congress to the humblest cottage, and even from beyond the seas; for their fame and their virtues have extended to the "uttermost bounds of the earth," without any attempt on our part to introduce them beyond the limits of our own country.

To these who have already made use of our Remedies, no appeal is necessary. To the thousand of Invalids and Afflicted,—reduced to the last stage of suffering from having exhausted every remedy but the one adopted to their case, and who, in their extreme, have resorted to ours, and found in its use a "Panacea" for "all their ills,"—and who have been restored to themselves, to their friends, and to a full appreciation of life and its enjoyments, and who, instead of calculating the value of existence, look to the future with hope and without apprehension, we do appeal with a pride and satisfaction consequent upon the knowledge that these changes have been effected by the use of our Specialties.

That our Medicines possess astonishing properties in warding off as well as in curing disease, in rejuvenating the debilitated and sinking powers of nature, and giving to the pale and emaciated Dyspeptic and the wan and bloodless Consumptive, the ruddy hue and glow of health and the elastic and buoyant of youth, is acknowledged wherever their merits have been tried and their virtues tested.

We might say much more introducing this little messenger, our annual harbinger of Health and Happiness, to the numerous families of our land; but it is not necessary; for our motto has always been, and is, "Our Remedies, praise us, and not to praise ourselves. All we ask is, that you will prove our medicines, and hold fast that which is good."

TO OUR PATRONS.

ECLIPSES.

In the Year 1858 there will be four Eclipses, two in the Sun and two of the Moon, viz.:

1. — A Total Eclipse of the Moon, August 21, not visible in the United States.

2. — A Partial Eclipse of the Sun, March 15, visible at Washington and Boston. Eclipse begins on the Earth in long. 38° 51' E. of Washington, at 6h, 35m. A. M. Washington mean time, and lat. 38° 51' N. Central Eclipse begins at 7h, 31m. A. M., in long. 23° 21' W. of Washington, and lat. 23° 21' S. Central Eclipse ends at 9h, 53m. A. M., in long. 23° 21' W. of Washington, and lat. 23° 21' S. Eclipse begins at 7h, 31m. A. M., in long. 23° 21' W. of Washington, and lat. 23° 21' S. Ends at 9h, 53m. A. M., but not visible in these parts.

4. — A Total Eclipse of the Sun, September 7. Eclipse begins on the Earth in long. 23° 21' W. of Washington, and lat. 23° 21' S. Central Eclipse begins at 7h, 31m. A. M., in long. 23° 21' W. of Washington, and lat. 23° 21' S. Ends at 9h, 53m. A. M., but not visible in these parts.

Morning Stars. — Mercury, about February 1, June 7, September 30.

Evening Stars. — Saturn, about April 20, August 18, December 15; Venus, about October 3.
Balsam of Wild Cherry, For the Permanent Cure of
Consumption! And all its Incipient Symptoms, such as
Coughs, Colds, Hoarseness, Croup, Influenza, Bleeding of the Lungs, Liver Afections, Pains in the Breast or Side, Night Sweats, Phthisis, Inflammation of Lungs and Throat, Whooping Cough, Asthma, and all Bronchial Afections.

Pulmonary Consumption, from its having so long and so persistently baffled the skill of the physicians, and defied its attempts to arrest its symptoms, has been termed, not improperly, the “apophasis of medical science,” and, until within a very recent period, has been classed by the highest medical authority as a disease not only incurable, but as holding out no hope to the afflicted, and inducing, consequently, in the mind of its victim, the awful reflection that the grave only could terminate its sufferings. But the progress of science is onward, and medical knowledge is so rapid in its advancement that in this generation it undertakes the cure of diseases which, in the preceding one, it abandoned as incurable. In arriving at these great changes, or rather in accomplishing these revolutions, some new theory is advanced which utterly repudiates and exploded the acknowledged and settled practice of the past, and inversion practices were received not only as credible, but impregnable.

What was at first proclamed by Dr. Wistar, as the result of his long investigations and intimate knowledge of the vegetable kingdom, added to his talent as a theoretical and practical chemist, had discovered a Remedy which would not only relieve but actually cure that Soreness of the Lungs, and Eane of Breath, so common in Pulmonary Consumption, it may be believed, the fact was received without incredulity, and with satisfaction. A remedy should suddenly be presented to the public professing to cure a disease, to reduce which medical skill had exhausted itself in fruitless efforts, was more than even the credulous portion of the community could receive with confidence. But Dr. Wistar knew the value of his discovery, and its amazing power in curing the long train of diseases whose termination, unless arrested by the proper remedy, is Consumption! At first it was only thought of, having exhausted every remedy without relief, and had become desperate in the face of disease and suffering, who accepted the proffered succor, which they did with the same faith that a drowning man hopes for immunity from destruction in “catching at a straw.” Its effects were so astonishing, its cures so surprising, that it at once “woke the nation,” its virtues were soon “known abroad.” It did not take years to secure the confidence of the community—it was received in a day, and it has ever since maintained its position.

And though since its discovery its parents have rolled on, and “old things have passed away;” though removals with number, in every shape and under every name, have been forced upon the public, and after a brief existence, by force of their intrinsic worthlessness, have “died and made no sign,” the name of “Wistar” still exists; is cherished by the afflicted as an inestimable cordial— as the true “Balm of Gilead.” It is as effectual now as in the early date of its discovery. So long as Diseases of the Throat and Lungs exist and afflict our race, so long will our Remedy be demanded as applicable to their relief and cure.

If, twenty years since the Balsam of Dr. Wistar was hailed by the Invalid as the only medi- cine which had restored the color to his blanchèd cheek, and to his enfeebled frame, is it not now performing the same wonders? And will it not twenty years hence be hailed by our successors as the only remedy which had restored the sinking powers of their ancestors, and which will perform the same service for them when their enfeebled constitutions require it? “The thing which hath been shall be.”

“The thing which is continually washing away the dissolute Fabrics of other Medicines, passes without Injury by the Adamant of Wistar.”

Bleeding at the Lungs Cured.

Seth W. Foote, Esq. Dear Sir: Having been attacked with hemorrhage of the lungs, which left me with a pleurisy cough and the usual debility consequent upon such an attack, and having cured myself by the use of "Wistar's Balsam of Wild Cherry," I feel it a pleasure and a duty to testify to its merits. My general health is improved, and I am much relieved in the coughing which becomes so painful. I attribute all the good effects of your Wild Cherry, as I too, to other medicines whatever. I recommend it to all my friends. Respectfully yours,

SAML. P. ENKINS.

The following Letter from Rev. Henry Wood, of Concord, N. H., late Consul to Brazil, form the Editor of the Congregational Journal, and now Chaplain in the U. S. Navy, speaks volumes in favor of Wistar's Balsam:—

Concord, N. H., March 2.

Mr. W. S. Foote, Esq.: Two years ago, a sudden and violent attack upon my lungs confined me to bed for several weeks; and when I recovered, I was so much oppressed by difficulty in breathing that I was often unable to sleep or rest upon a bed by night. The suffering was extreme, and from the inefficacy of the remedies used, I supposed the disease incurable. Being persuaded to try a bottle of Wistar's Balsam of Wild Cherry, without the least confidence in its efficacy, I found the difficulty almost entirely removed before one bottle was used up. Having a mortal aversion to any medicine, no solicitation to use it in any form, sympathy with my fellow-sufferers induces me to make this public statement, and recommend the article to others similarly afflicted.

With respect, yours truly,

HENRY WOOD.

Domestic Receipts, &c.

Snow Bread.—We find the annexed paragraph in one of our exchanges.

All persons, whose snow breads are not, perhaps, aware of the value of this flour made in making light, delicious, and wholesome bread. There is no "raising" in the world so perfectly philosophical as good, fresh snow, which, if raised, as the beest yeast, or the finest acids or alkalies, while it leaves no taint or ferment, is the very acid, or injurious neutral salt, like the latter. Indeed, it raises by supplying a simple element whereby to lift up the dough, while other methods only supply carbonic acid gas.

A delicious Way to Prepare Tomatoes.—Soak the Tomatoes in cold water, peel and cut them, and stew with sugar to the taste, add a little salt.

Pickles.—An excellent way to make pickles that will keep a year or more is to drop them into boiling hot water, but not boil them; let them stay ten minutes, wipe them dry, and then drop into cold, cold, spiced vinegar. Put them in light jars, and place them in the cellar.

Recommendations of Wistar's Balsam of Wild Cherry.

Its virtues have reached the "utmost bounds of the earth."

The following letter was received from Colonel Markham, of the British army, and shows the esteem in which the Balsam of Wild Cherry is held abroad:

"Dear Sir: I have a daughter in a delicate state of health, who, I think, has received signal benefit from Wistar's Balsam of Wild Cherry, three bottles of which were sent her by her brother in Canada. Please put me up six bottles, and forward them by the first steamer to Southampton or Liverpool, as you may find most convenient, with any account of the medicine you may be so good as to send me. I have a whole bottle of it in vain.

Believe me yours truly,
W.M. MARKHAM.

The following certificate from S. A. Walker, Esq., well known in the region in which he resides, as an extensive real estate auctioneer, and whose advertisements of the cates sold by him are composed in a style so beautiful, poetical, and picturesque that he is familiarly known as "George Robbins of America."

Brooklyn, February 6, 1854.

To S. W. Bowles, My dear Sir: Having experienced results of a satisfactory character from the use of Wistar's Balsam of Wild Cherry, in cases of severe colds, during the past two years, I am induced to express the full faith I have in its invigorating power. I was first induced to try this medicine as an experiment, about two years ago, in connection with the strong recommendation of a friend, who was well skilled with consumption, and whose relief from the use of it satisfied me of its great value in cases of colds and dyspepsia, and now clearly demonstrating to my mind its great value as a restorative, that only a fair trial to insure a grateful demonstration from the public.

Your obedient servant,
S. A. WALKER.

And still another case of hereditary consumption cured by Dr. Wistar's Balsam of Wild Cherry; a father and sister of the restored having died of that insatiable disease.

General Western Agent for Dr. Wistar's Balsam of Wild Cherry. Dear Sir: Our family are predisposed to that terrible disease, consumption; my father and sister having died of that disease. I have been predisposed to consumption, and about three years since, was entirely incapacitated by frequent attacks of consumption, and for weeks was desponding of life. My physicians and friends all considered my case as hopeless, and recommended me to take a small dose of Wistar's Balsam of Wild Cherry, and commenced giving me a few drops at a time, as my coughing spells came on, and from the first I felt a change for the better, and in less than a week I felt better and slept well. From this time I began to have strength and energy, and after a few days, I was enabled to take the Balsam of Wild Cherry regularly and in full doses. My appetite and my digestion became good, and to the astonishment of all that knew me, I recovered. It is to Dr. Wistar's Balsam of Wild Cherry and have, since that, under the blessing of Providence, that I owe my recovery. Without your attention and care, I know not what my condition would have been.

Your obedient servant,
J. W. BROOKS.

DOMESTIC RECEIPTS, &c.

Aquat Print. — Purify large glasses, which have been used for drinking, by boiling them in water, which will have the effect of cleaning, and removing all the germs. When thoroughly clean, pour in a strong solution of muriatic acid, and let it stand for an hour or two. Then rinse it thoroughly, and hang it up in a clear place. When not in use, keep it in a box, covered with a cloth.

Candied Orange. — Take the small, dried oranges, and boil them in a sugar syrup, until they are well done. Then strain the syrup, and mix it with the sugar, and boil it until it thickens. When done, pour it over the oranges, and set the pan for a new batch. This process will soon clear the house of any ant, mouse, or pest.

To Clean Paint. — Never use a cloth, but always a sponge, with soap and water, which will have the effect of removing all the dirt and grime. When the paint is thoroughly clean, brush it with a clean cloth, and then allow it to dry, without any further treatment.

Milk. — When using milk, first boil it thoroughly, and then let it stand for an hour or two. When done, pour it over the oranges, and set the pan for a new batch. This process will soon clear the house of any ant, mouse, or pest.

IN ALL ITS FORMS,

Which are developed under the Symptoms of

Asthma, Heartburn, Pains in the Stomach, Halitosis, Costiveness, Acid Stomach, Headache, Loss of Appetite, Fibles, Water Bruish, Night Sweats, Flatulency, Nervousness, Liver Complaint, General Dehility, Depression of Spirits, and Indigestion.

DYSEPSIA or DIGESTION exists when the stomach is incapable of performing its appropriate functions, of changing the received food into chyme. Whether the immediate cause of dysepsia is to be sought in the debility of the muscular fibre of the organs, or in the defect or bad character of their secretions, is a question not easily determined in all cases. There is little doubt, however, that both causes usually coexist; the tendency of the food to the avarous fermentation seems to be the effect of the latter; while the tendency to distoration, and the difficulty with which the aliment is urged forward into the intestines, is a proof of the former. Other symptoms of dysepsia, besides those already referred to, are oppression at the stomach after food is taken; a sense of weight and dragging about the limbs while the digestive process is going on; a sensation of nausea, rather than hunger, felt whenever the stomach is empty; a disposition to sleep after meals; and, frequently, a dull, heavy pain about the head; a depression of spirits without any assignable cause.

Collaterally, dysepsia is developed under the various symptoms at the head of our article: the modes in which it is induced are numerous; but, aside from itself, it seems to be a disease indigenous to our climate, peculiar to our countrymen. Whether infected by constitutional causes, or by the dietetic habits of our people, remains to be determined; but one thing is certain,—it does exist in a most frightful degree.

It is reasonable, then, that minds of an investigating character,—that physicians, who have seen the terrible amount of suffering incident to the universal diffusion of the disease,—should direct their attention to the discovery of some remedy which would relieve poor humanity from the incubus which presses so heavily upon it. It was in this spirit that the mind of Dr. Greene became interested, which resulted in his establishing a series of experiments, and finally producing this Remedy, which, after years of trial, seems to be the only acknowledged Specific for the cure of all who suffer from any of the disorders assignable to Dysepsia or Indigestion.

No matter under what phase of its Proctan character this disease appears, these Bitters hold the secret of it, removing it forcibly from the system; renewing the vital powers of the sufferer, and restoring his long lost vigor; accomplishing this at once, without the long delay and “hope deferred” process usually required to relieve all chronic affections.

In conjunction with, we submit that this is a Medicine which has made its way into public favor, solely upon the basis of its own merits; that the cure it has performed, and the good it has accomplished, justly the appellation it has generally received as the

GREATEST SPECIFIC OF THE AGE.

**CAUTION.** Remember that the GENUINE Wistar’s Balsam has the written signature of I. BUTTS ON the Wrapper; all other is not only spurious, but worthless and deleterious.
IMPORTANT TESTIMONY IN FAVOR OF THE OXYGENATED BITTERS.

From our numerous certificates of the cures effected by the use of the Oxygenated BITTERS, we select a few.

From the Boston Evening Gazette, April 11, 1857.

A CURE FOR DYSPEPSIA. — If human testimony amounts to anything, then a cure has been found for Dyspepsia. None but those who have suffered all the maladies of this distressing disease can estimate the value of a medicine that can cure it. The Oxygenated BITTERS have proved eminently successful in some of the worst cases which we have ever known. Names of the highest respectability are daily offered to the proprietors, a few of which only can be published in our limited space.

The following, from a well-known contractor, of New York city, presents a strong case:

Brooklyn, N. Y., April 7, 1857.

Messrs. Seth W. Fowle & Co., 130 Washington Street, Boston, Mass.: —

To Messrs. Seth W. Fowle & Co.: I am happy to state that I have used the Oxygenated BITTERS in my practice for the last three years in the treatment of Dyspepsia, General Debility, Indigestion, and Affections of the Liver, with the most satisfactory results; and would cheerfully recommend them to those suffering from these distressing diseases to give this valuable medicine a trial.

Respectfully yours,

J. E. SMITH, M. D.

Messrs. Seth W. Fowle & Co.: Having last September procured four bottles of the Oxygenated BITTERS, I have made use of them in my practice to my full satisfaction. If you had an agent in this county it would be the means of placing this very valuable medicine within the reach of many who are now compelled to go without it, and in obtaining it in this region.

Respectfully yours,

C. H. GORDON, M. D.

Messrs. Seth W. Fowle & Co.: Having been for many years troubled with a disease pronounced by physicians Dyspepsia, and having tried various remedies without any favorable result, I was, at last, in consequence of having perused an article incidentally thrown in my way, to try the Oxygenated BITTERS. I procured a bottle from Mr. Emerson, your agent in this city, and very soon had the satisfaction of proving the medicine what it purports to be — a cure for Dyspepsia. I have ever since enjoyed perfect health, and have recommended the BITTERS to many of my friends, who have used them with like success.

BENJAMIN WEBB.

Extract of a Letter from a Clergyman to a distinguished Physician in Boston.

East Tawton, March 2, 1857.

Dear Doctor: The Oxygenated BITTERS which you sent me have been of great benefit. Indeed, taking most of my time, I am better than I have been for years. I have been taking I have discontinued, as not assisting the wonderful powers of the BITTERS. It seems to me that under their influence I am fast regaining my lost health, and soon shall be completely restored.

MESSRS. FOWLE AND COMPANY.

IMPORTANT TESTIMONY IN FAVOR OF THE OXYGENATED BITTERS.

LETTER FROM AN EMINENT PHYSICIAN.

To such of our readers as are troubled with Dyspepsia, or kindred complaints, we commend the following letter from a well-known Physician of Massachusetts, in favor of the Oxygenated Bitters. This is certainly a remarkable Medicine, if the facts and opinions already given are true, and I have no reason to doubt it, when the names of such men as Dr. Porter are given to the public as vouchers. — Portland Gazette.

Haverhill, Mass, June 1, 1856.

S. W. Fowle & Co. Gentlemen: While suffering from Dyspepsia some years since, and trying almost everything for its removal without any benefit, I was accidentally led to make use of the Oxygenated Bitters, and after a short trial of them found my health improving, and in time my disease radically removed. Since then I have used them in my practice, and generally with good success. I know of no medicine so well adapted to the cure of Dyspepsia, in many of its aggregated forms. I have seen the most stubborn cases, which had resisted almost all the preparations commonly used for indigestion, yield, as by magic, upon the administration of a few doses of those Bitters. Such results have increased my confidence in their medicinal powers, and strengthened my convictions of their superiority over all other instrumentalities, in the treatment of the complaints for which they are recommended.

I would certainly advise those troubled with Dyspepsia to use the Bitters; and I am confident that all who do so will reap great benefit, if there is nothing to contra-indicate their use.

A. R. PORTER, M. D.

COPY OF A LETTER FROM THE HON. DAVID HOOD.

Thompsonville, Conn., Sept. 14, 1855.

Gentlemen: Having been greatly benefited by the use of your Oxygenated Bitters, I am glad to make a public acknowledgment of the fact, believing, as I have good reason to do, that no other remedy, ever offered for the cure of Dyspepsia, or other disturbances of the stomach, possesses equal merits. I suffered for a period of nearly twelve years with pain in the stomach, flatulence, costiveness, &c. My physician attributed my troubles, in part, to the too free use of tobacco. He could not reach my heart.

I applied to several surgeons, but with the same want of success. I could get no permanent relief from any source. I have heard of your Oxygenated Bitters favorably spoken of, but not until despairing of ever regaining my health did I commence using them. To my surprise, I began immediately to improve, and a few weeks' continuance of the use of the medicine completely restored me to good health. I can recommend your Bitters with much confidence for all diseases of the stomach. Yours with much respect.

(Signed)

DAVID HOOD.

OXYGENATED BITTERS IN EUROPE.

From Rev. L. DoLittle, a highly respectable Clergyman.

Paris, November 1, 1852.

Dear Sir: About two years since I made use of a few bottles of your Oxygenated Bitters for a stomach complaint, which was at that time relieved.

Since my stay in Germany and France, I have found my old enemy, irritability of the stomach, returning again. I have not found any prescription to afford me relief, and I made inquiries in London for your Oxygenated Bitters, but could not find any. I write now to beg you will do me the favor to send by the earliest steamer to Havre half a dozen bottles.

An old friend of mine in England, Captain Jackson, of the British army, found, on my arrival, suffering from Asthma, manifestly the result of Dyspepsia. I send him an additional half a dozen bottles. I should like to have the captain try the medicine.

I am not aware that my name is known to you. I have been the resident clergyman for some twenty-three years, in Sheerness and Lemoine, Canada East, to which charge I am now attached. I remain your obedient servt., L. DOOLITTLE.

A MODE OF COMPUTING INTEREST.—Multiply the sum by the number of days; first product, divided by 12, will give the interest in dollars; second product, divided by 365, will give the interest in cents.

Example: $2000 at 6 per cent, for 13 days.

Divide the product by 365 (4010) cents.

50.7 cents per cent is used, add 6 per cent, this is one sixth.
WISTAR'S BALSAM
A REMEDY FOR DIARRHOEA AND DYSENTERY.

We have never claimed for the Balsam remedial qualities for any other disease than those for the cure of which it has attained its reputation as the "GREAT REMEDY." But we consider it our duty, at this late day, to make known that for those complaints which may be classed under the head of Diarrhoea, Dysentery, and Summer Complaints, it possesses the same healing, antiseptic, and curative properties that it does for those diseases in curing which its present celebrity has been attained.

A CURE FOR WHOOPING COUGH.
St. Hacsthite, Canada E., Aug. 21, 1858.

Messrs. Seth W. Fowle & Co. Gents: Several months since a little daughter of mine, ten years of age, was taken with whooping cough in a very aggravated form, and nothing could we do for her seemed in any way to relieve her suffering. We at length decided to try a bottle of your Dr. Wistar's Balsam of Wild Cherry. In three hours after she had commenced using it, she was greatly relieved, and in less than three days was entirely cured, and is now well. I have since recommended the Balsam to many of my neighbors, who have used it, and in no case have I known it fail of effecting a speedy cure.

You are at liberty to make any use of the above you think proper. If it should induce any body to use your Balsam I shall be glad, for I have great confidence in it.

Yours,
P. GUITIE, Proprietor of the Courier de St. Hacsthite.

SCURVY CURED BY THE OXYGENATED BITTERS.

This dreadful disease is generally confided to those who pursue a seafaring life, and who, from long deprivation of fresh food, are reduced to the necessity of subsisting upon salted provisions. Were the OXYGENATED BITTERS in hand in such cases the ravages of the disease would at once cease by their use. The great tonic properties, added to the aseptic nature of the Bitters, at once cause the disease to subside, while at the same time they restore the patient to his usual strength.

The voyage, of any length, should be undertaken without a supply of this invaluable Remedy, which retains its virtues unimpaired in the heat of the tropics or cold of the arctic.

SEA SICKNESS.
(NAUSEA MARINAE)

The nausea at sea, and the retchings and vomitings experienced at sea by those unaccustomed to sea life, — caused sometimes by the motion of the vessel, and sometimes by the disordered state of the stomach, — can be at once remedied by the stomach remined to a healthy and natural tone, appetite induced, and the whole man fitted to enjoy the "romance of the sea," by the use of the OXYGENATED BITTERS.

From the Greenfield Gazette and Courier, March 30, 1857.

OXYGENATED BITTERS. — It is not often that we have much faith in the patent medicines advertised, or recommend their use to our readers; but, having given the Oxygenated Bitters advertised in our columns a fair trial, and been greatly benefited by their use, we can, with confidence in their efficacy, recommend them to such of our readers as may be afflicted with that horrible disease, the dyspepsia, or any derangement of the stomach or digestive organs. We have been for years more or less affected with dyspepsia, but very last summer were attacked with it in its worst form. We tried several remedies, but none of them did us any permanent good. We at last purchased a bottle of the Oxygenated Bitters; and, before we had taken it up, the disease and all of its symptoms disappeared, and although we have since paid no regard to our diet, but partake as freely of any and all kinds of food as any member of our family, we have not had a return of dyspeptic symptoms more than three or four times, and then they would again immediately disappear upon taking a dose of the Bitters, of which we keep a bottle on hand.
Wistar's Balsam of Wild Cherry.

RECOMMENDATIONS.

Messrs. S. W. Fowle & Co. Gents: It is now some four months since that I was attacked with a severe bronchial affection, which reached my lungs and throat generally, causing severe suffering and inflammation. I tried many remedies without the slightest relief, when my attention was called to an advertisement of "Wistar's Balsam." I was induced to try it, and my complaint was immediately cured, and in view of the great help I have received from your specific, cannot refrain from expressing my gratitude to the inventor of this valuable medicine.

G. A. Kenyon.

Yours truly, E. P. HOWELL.

Madison, N. Y., March, 1857.

Messrs. S. W. Fowle & Co., Boston. Gents: We have sold your Balsam for more than ten years. We always recommend it to any one suffering from a cold, cough, or any lung or throat complaint. We introduce it by saying to our customers, "Take it; try it; and if, after saving half a bottle, you say it is not worth the money, return it." We never had a bottle returned. We send you a certificate from C. Kirkwhite, Esq., who is a gentleman extensively known and universally respected. Yours truly, J. D. & H. W. LANE.

Madison, N. Y., March, 1857.

Messrs. S. W. Fowle & Co., Boston. Gents: It is a pleasure to me to acknowledge the virtues of Dr. Wistar's Balsam of Wild Cherry. My case has for several years been pronounced one of "incurable consumption." Wistar's Balsam was recommended. I have used it; and it has been a source of inestimable relief to me. I think it the best medicinal agent in the patent medicine vocabulary for lung or throat complaints. Although not desirous of becoming aorary as puffing your specific, I feel sustained in recommending this to all suffering from coughs or colds. Yours, C. KIRKWHITE.

The following Letter, just received by the Proprietor of Dr. Wistar's Balsam, from a well-known Physician in Pennsylvania, shows the high estimation in which this Preparation is held where it is best known.

Messrs. S. W. Fowle & Co., Boston. Gentlemen: Please forward me, without delay, by Adams & Co.'s Express, three bottles of Wistar's Balsam of Wild Cherry, for which I enclose the money. I procured one bottle in this place, which was all I could find. This I have given to a patient, who has received so much benefit from its use that I am anxious to continue it.

Why do you not establish an agency for the sale of the Wild Cherry in this place? I would buy a ready sale.

Yours, respectfully, A. HAHNBERGER, M. D.

Perryville, Juniata County Pa., March 10, 1857.

Baltimore, Dec. 18.

Dr. Seth W. Fowle, Boston, Mass. Dear Sir: I feel it to be due to you to say, that a young lady, a member of my family, had been suffering for several years under a bronchial affection, and had been treated by several different mediators without benefit. I have been consulted, that great fears were entertained that the disease would terminate in death. I was induced, through the persuasion of a friend, to try your Balsam of Wild Cherry; and, after she had taken three bottles, she felt entirely relieved of the attack.

Yours, J. F. MJILTON.

DOMESTIC RECEIPTS, &c.

TO PRESERVE APPLES.—If apples are imersed in brine of any kind, they will keep good all the year round, and the grain will not in any way be damaged. This does not need any preparation or expense, as the apples may be put into a crock or into a tub, and the corn intended for food for horses or poultry may as well be stored in this way as any other.

TABLE BEER FROM SUGAR.—To make four pounds of coarse brown sugar add ten gallons of water, then put in three ounces of hops, and let the whole boil for three quarters of an hour, and work it as usual. It should be kept a week or ten days before it is tapped, when it will improve daily afterwards within a moderate time of consumption.

CAUTION.—Remember that the genuine Wistar's Balsam has the written signature of L. BUTTS on the wrapper; all other is not only spurious, but worthless and delusive.
TO DYSPERTICS AND CONSUMPTIVES!

A Distinguished Physician and Writer on Physiology, having long observed the Merits of our Preparations, as well as having tested their Virtues from personal experience, writes us as follows:—

WISTAR'S BALSAM OF WILD CHERRY.

MESSRS. S. W. FOWLER & CO.

Gentlemen: The two great Diseases which destroy the happiness and comfort of individuals and families, and bring down even on an early grave a larger number of men and women in our country than any, or, perhaps, all others, are

CONSUMPTION

AND

DYSPERTIS.

or Indigestion. For the former of these, Consumption, you have for many years furnished the best and most efficacious Remedy in the form of "Wistar's Balsam of Wild Cherry." But of this we are not now to speak particularly, save only to say that it still holds the front rank of all medicines for Diseases of the Lungs, as it has heretofore done.

GREENE'S OXYGENATED BITTERS.

It is now the opinion of the best physicians, both in this country and in Europe, that Consumption begins in Dyspepsia; that the whole system becomes diseased before its development in the lungs. This was the opinion of the immortal Rock, who calls it "Consumption, a disease all over," and is now the opinion of Dr. Ingham Bennett, who has had greater opportunities for examining this disease than any other living man; and of Sir James Clark, Physician to Queen Victoria. This opinion is, beyond doubt, a correct one. All remedies, then, when Dyspepsia first shows itself by general debility, constipation, flatulence, liver complaint, sour stomach, &c., must be calculated to remove this general prostration of the whole system. Now, there is no remedy known to be so efficacious in removing this general disease—this general prostration of the whole man, as the Oxygenated Bitters. They attack the disease in its earliest manifestations, by relieving the sinking powers of the patient; by restoring lost appetite, correcting acidity, purifying and strengthening the gastric juice, and rendering it capable of properly and thoroughly digesting the food, thus forming healthy chymus and chyle, and preparing the assimilating agent to take up the nourishment and carry it into the system, thus renovating the old and crazy machine by new modeling and purifying the whole mass of blood. In a word, it can be shown from hundreds of certificates, from the most eminent and reliable persons, that there is no medicine calculated to pour oil into the exhausted lamp of life like the Oxygenated Bitters.

Let all, then, when health first begins to fail; when the vital powers first seem to be giving way; when appetite first begins to fail, and the nerves to tremble; when the men, instead of being refreshed and invigorated by sleep, "Tired nature's sweet restorer," finds himself more weary in the morning than when he went to bed at night,—let him delay no longer, but at once commence taking your Bitters. He will soon find, as I have, the quickening powers of nature reviving, and general health returning. But it is unnecessary to say more, as no one can know the value of this medicine till he tries it.

Still, if any have passed this dyspeptic period of the disease, and feel their lungs now beginning to fail, they should lose no time before taking the BALSAM. This must then be laid hold of as their "Sick Anchor." **

** CAUTION.—Remember that the Genuine Wistar's Balsam has the written signature of J. BUTTS on the Wrapper; all other is not only spurious, but worthless and delusive. **

Greene's Oxygenated Bitters.

OPINIONS OF THE PRESS.

There is no class of our fellow-citizens whose opportunities are more ample to test the value of any specific presented to the public for the cure of many of the diseases which afflict humanity, or more ready to give public expression and sanction, when confirmed by observation and experience, of the merits or demerits — the value or worthlessness — of such medicine, than that connected with the Press.

Our testimony from this influential source is ample enough to fill a volume; but as an expression of the whole, we subjoin a few of these opinions.

From the Ellenville (N. Y.) Journal, April 30, 1857.

OXYGENATED BITTERS. — As a remedy for Dyspepsia and General Debility, this popular medicine, we believe, stands unrivalled. It has an almost world-wide celebrity. The Editor of the New Hampshire Patriot and State Gazette bears the following decided testimony to the merits of this excellent, popular medicine: —

"Having suffered for several years with a confirmed Dyspepsia, the junior partner of this paper has been led to make a trial of the Oxygenated Bitters, with results so satisfactory to himself that he is induced to commend them to the public as a palliative and cure of indigestion and the thousand consequent evils. Several gentlemen of our acquaintance in this vicinity have already made successful use of this medicine, and join us in our cordial recommendation."

From the Boston Olive Branch, April 25, 1857.

A REMEDY FOR DYSPEPSIA. — None except those who have suffered all the miseries of Dyspepsia in its various forms, can appreciate the value of a medicine that will cure this disease. To all who would find a remedy, we say, try the Oxygenated Bitters. The efficacy of this medicine in cases of Dyspepsia, Asthma, and General Debility has been attested by many citizens who are well known to the public, and whose statements can be relied upon. The Bitters have been tested by scientific men of unquestionable authority, and prove that it contains the most valuable tonic properties. Being free from alcohol, no reaction is suffered by the most delicate constitutions. A Medicine scientifically and skillfully compounded, which makes no undue pretensions, and is recommended by citizens of the highest respectability, deserves the patronage of the public. Such a medicine is the Oxygenated Bitters.

TABLE OF DISTANCES — STATISTICS OF THE ARMY AND NAVY.

Distances from Washington. The following is a list of the capitol of the states, with their distances from Washington, D. C., by the post office records, according to the course of the mail:

Oxygenated Bitters. — Opinions of the Press.

Messrs. S. W. Fowie & Co., Boston. Gentlemen: Your Oxygenated Bitters should be better known in the Western Country, for we have among us thousands who are suffering from Dyspepsia. I feel that I am indebted to your Bitters for my recovery from this awful disease. My habits at this time were sedentary; and my complaint was aggravated by too close confinement. I despaired of relief, and considered myself a hopeless dyspeptic. I concluded to try the Oxygenated Bitters, and a wise conclusion proved to be true. I have taken, in all, four bottles, and I am cured. Although rather a small man, my present weight is 160 pounds. Your Bitters need only to be known to have a very extensive sale in this section of the country. Respectfully, &c. J. B. MELLWIN, Ed. Journal.

The Right Sort of Evidence. — The following testimonial to the value of the Oxygenated Bitters, we extract from the Burlington Sentinel, signed by John G. Saxe, Esq. Mr. Saxe had for a long time labored under a series of complaints induced in part by indigestion; and, by a moderate but continued use of the Bitters, was restored to a degree of health to which he had been a stranger for years. This is but one of a thousand cases that are constantly occurring. They stamp the Bitters as one of the very best compounds ever prepared. Hear what the poet, editor, and lawyer, Saxe, says:

"OXYGENATED BITTERS. — While many persons are, doubtless, over credulous in regard to patent medicines, others err, on the other side, by being too sceptical. The truth is, that, in regard to the Bitters, as in respect to other things, no worthless article can attain high popularity; but if a medicine has intrinsic value, it is sure to find favor if properly brought before the public. Among the few really valuable remedies are the famous "Oxygenated Bitters." This we know by having used them for indignation with the best results, by the acknowledgments of physicians, and by their general popularity. We can, therefore, conscientiously recommend them for the complaints which they profess to cure."

From the Watchman and Observer, Richmond, Va.

The Oxygenated Bitters is a very valuable medicine for Dyspepsia and a variety of other complaints.

From the Congregationalist.

OXYGENATED BITTERS. — We have never knowingly recommended or advertised a quack medicine, and we speak favorably of these Bitters because we believe that they are really and highly useful. The certificate of such a man as Prof. A. A. Hayes, M.D., State Assayer, is enough, we should think, to secure this medicine from all suspicion of quackery or deception. He says: "The composition of these Bitters exceeds the experience of physicians. Their long record of success is a verification of their fame. It is well certified, contains no alcohol, and no metallic salts. Its value, and the truth of the statements made respecting it, may be further inferred from the names of many distinguished gentlemen.

The following Testimonial is from a New York Paper.

OXYGENATED BITTERS. — An intimate friend of ours has for years been afflicted with all the accumulated evils of a confirmed Dyspepsia — a complaint which he characteristically describes as "Protein in its forms and Pandorean in its effects." He has been nearly unfaithful for months, and his health has been the most inexorable. He has made the rounds of the "pathies," without experiencing permanent relief. He had lived on low diet, and sometimes on almost no diet at all, until he had become but the shadow of his former self. Happening to drop in upon us one day last summer, we presented him with a bottle of the Oxygenated Bitters, not because we had faith in its power, but because he had tried every thing else, and we wished him to leave nothing untried. He took it, as much to oblige us as for any other reason, and he now writes, "Before half of the first bottle had been used, a bloodshot headache, to which I have been long subject, departed, my appetite returned, and what is better, digestion returned with it. I have continued to use it ever since, from time to time, and am recovering my wonted fulness of flesh, and enjoy a buoyancy and elasticity of spirits that removes life itself from my expression."

DOMESTIC RECEIPTS, &c.

Fine Blacking for Shoes. — Take four: To make Planters keep their Color, add two ounces of the compound. And not blushing. — Put them in a pot, and cover a tablespoonful of sweet oil, and a pint poor boiling water on, letting them lie till cold, of small heat; mix them gradually cooled.

The first time of washing.

MOON'S PHASES.

New Moon... 5d. 11h. 41m. Morn.
First Quarter... 18 3 34 Even.
Full Moon... 29 9 17 Even.
Last Quarter... 27 0 27 Even.

Conjectures of the Weather.

2d, for this season: 4 to 7, changeable.
11 to 12, cooler: 14 to 17, cool winds; 18 to 20, some snow expected: 21 to 25, stormy: 26, moderate, and grows more comfortable for remainder of month.

45) 23d Sunday after Trinity.
Venus in Aries.
Day's length, 10h, 13m.

46) 24th Sunday after Trinity.
Mars in Pisces.
Day's length, 9h, 57m.

47) 24th Sunday after Trinity.
Jupiter in Gemini.
Day's length, 9h, 44m.

48) 25th Sunday after Trinity.
Saturn in Leo.
Day's length, 9h, 34m.

1st Sunday in Advent.
Saturn in Leo.
Day's length, 9h, 34m.

2d, for this season: 4 to 7, changeable.
11 to 12, cooler: 14 to 17, cool winds; 18 to 20, some snow expected: 21 to 25, stormy: 26, moderate, and grows more comfortable for remainder of month.
CONSUMPTIVE PATIENTS

Will please read the following statement from the Harrison Gazette.

The incorrigibles are invited to read the following note from Rev. Mr. Coddrum, whose character for truth and veracity stands above suspicion, and have their doubts dispelled as to the superiority of Wistar's Balsam of Wild Cherry over all remedies now before the public of the same character.

It is no less a duty than a pleasure to state, for the benefit of the public, that I consider Wistar's Balsam of Wild Cherry a great blessing to the human race. Having tried it in a case of severe affection of the lungs, I unhesitatingly recommend it to those similarly afflicted, as the best remedy I have ever tried, and one which cured me when physicians said I must die, and when I thought myself that my time was to depart at any hour.

WILLIAM COLDRON.

Two Lives saved by the use of only three Bottles of Wistar's Balsam of Wild Cherry.

Gent: The Dr. Wistar's Balsam of Wild Cherry that I bought of you, has been of such great benefit to me, that I wish to make its virtues known to the public.

My wife took cold at the time of confinement, which settled on her lungs. The physicians pronounced her disease consumptive. She had profuse night sweats, and had coughed; she was given up, for we expected her recovery, and her child partook of her complaint. She then commenced taking Wistar's Balsam of Wild Cherry, and three bottles effected an entire cure with her and the child both.

I have no doubt that they would have now been in their graves if they had not used Wistar's Balsam of Wild Cherry.

Seth R. Scary, the writer of the above certificate, is a man of such veracity as I can speak with entire confidence, and give the above statement.

SHEPHERD, HOWARD & CO.

BRONCHITIS AND COUGH CURED.

Boston, August 16.

Mr. S. W. Fowle. Dear Sir: Having been troubled for a considerable time with a bad cough and bronchial affection, I was induced to try a bottle of Dr. Wistar's Balsam of Wild Cherry, which I am happy to say entirely removed the cough and bronchial affection.

GEORGE H. DAVIS.

I hereby certify that I am personally acquainted with Mr. George H. Davis, Esq., and have the fullest confidence in the above statement.

H. G. Bairks, Practicing Physician.

Such testimony can be relied upon. Boston, Aug. 15.

DOMESTIC RECEIPTS, &c.

Virginia Corn Bread. — Dissolve one tablespoonful of sugar in three and a half pints of boiling milk; into this add one quart of Indian meal; when cool, add a half pint of wheat flour, a little sugar, a teaspoonful of salt, and two eggs well beaten; mix all well together, and set in a mold or a tin pan, and bake in a moderate oven. This bread is very light and crisp.

Fruit Cream. — Take half a cove of sugar, dissolved in a little water, pour it into a pan of fruit, then add a little cream, or a little milk; add a few cloves and a little cinnamon. Simmer the fruit until it is thick, and pour it into a mold and let it set. This is most excellent.

To Make Vinegar. — Boil slowly for one hour three pounds of very coarse sugar in three gallons of water, work it with a little yeast, and put it into a crock, and expose it to the sun, with a piece of brown paper passed over the hogshead; and it will soon become fine vinegar, fit for pickling any purpose.

To Make Mens Lay. — If a teaspoonful of caromqone pepper is given to a dozen hens with their food every other day, winter and summer, the quantity of eggs they will produce will be nearly doubled. So says Dr. Hall.

TOMATO KETCHUP. — Slice the tomatoes, and put a layer of salt over it, then another layer of onions and salt, and in this manner fill the jar, which is to be filled with a new layer of onions and salt, and then put in the jars. Then allow it to remain unopened for twelve days, then press the juice from the tomatoes, and mix it with the pepper, allspice, and clove. When it is perfectly dry, add about two ounces of salt to a part of the juice, a few blades of mace, twelve cloves, a spoonful of cumin seed, and the remainder pepper and allspice. In three months boil it steaming with fresh spices.

To Preserve Eggs. — If you take the eggs as soon as the hen has laid them, and smear the shells with vinegar, they will keep as good as new laid eggs for some time; but if you run the shells with water at any time, it will keep them good for months, and will prevent their getting hatched.
GREENE'S OXYGENATED BITTERS.
THE LATEST TESTIMONY.

From the Norfolk County Journal, June 16, 1857.

DYSPERTIA.

This is the story of a disease that is often disastrous, no matter of how long standing, or how severe. The wonderful panacea of Dr. Greene, of Windsor, Vermont, "The Oxygenated Bitters." Every one knows that Dyspepsia is cousin to almost all the physical, and some of the mental diseases that affect the human frame; and, when truly arrested, it results in consequences that vary from this and that, too. Everyone ought to be made aware of the fact, that the Oxygenated Bitters are a pleasant, safe, and sure remedy for it. We are in possession of reliable data upon which we based this assertion.

Copy of a Letter from a School Teacher in Detroit.

MESSRS. S. W. FOWLE & CO., Boston: In reference to the Oxygenated Bitters, I can state to you that I have been using them for several months with a remarkable degree of success. I have had no relief from dyspepsia that was not obtained while taking the Bitters. I have found them a great benefit in cases of dyspepsia and indigestion. I am now using them regularly, and have no reason to doubt their efficacy.

From the Savannah (Ga.) Republican, June 10, 1857.

There is no more healing diabetic issue than Dyspepsia. It upsets the entire frame, affecting the mind as well as the body. A sure remedy has long been sought for, but until lately, we believe, without avail. Messrs. T. M. Turner & Co. have the Oxygenated Bitters to give early and permanent relief. Besides being a remedy for this distressing complaint, they are a pleasant, wholesome, and invigorating summer drink, and are made without the use of alcohol.

DOMESTIC RECEIPTS, &c.

THE BEST FERTILIZER FOR HOUSE PLANTS is common, but diluted with water. An ounce of gold is sufficient for a gallon of water.

A WATER-PROOF MIXTURE FOR LEATHERS. Take a tallow, a lump of good rosin, the size of a common poker, 2 bushels of pitch of a heavy, hard, flaxen, tallow, and mix together, and gradually over a slow fire. When cold, the mixture should be made into a paste with warm milk, and put on with a clean sponge; the leather may be a little damp, not wet. The application of this paste with water and oil will not only prevent the water from soaking into the leather, but will keep the leather pliant and the last of the woe warm and dry. Every farmer who regards his boots and shoes as a fortress should supply himself with this mixture, and keep his boots and shoes in good condition.

SALTBATES. Dr. Alcot pronounces saltpeter poisonous and destructive to the human system. After ingesting an instance of very dangerous disease, induced by the use of saltpeter, causing muscular irritation, inflammation of one of the bones of the neck, and immediate mortification wherever a blister was applied. The doctor makes the following statement: There can be no doubt that the simultaneous action of the alimentary canal and the saltpeter, induced in both children and adults, is one cause of that dread mortality which prevails among those who are not properly and wisely when another cause operates, proves peculiarly alarming.

WATER FOR RHEUMATISM. Lemon juice is recommended as a certain cure for rheumatism. It is given in quantities of a tablespoon to twice the quantity of cold water, with sugar, every hour. The effect of the lemon juice was almost instantaneous in one case mentioned, in ten days the worst case was cured, and in seven the other was able to go out and perform ordinary tasks.

RECOMMENDATIONS OF WISATE'S BALMICH OF WILD CHERRY.

Northfield, Vt., October 18, 1855.

MESSRS. SETH W. FOWLE & CO. Gents.: In the winter of 1853 I was confined to the house, and part of the time to my bed, for two or three months, with a severe cough, produced by a cold. During that time, I lost nearly forty pounds of flesh. My friends were alarmed, and some thought I was going into a decline. I was advised to try Wistat's Balmich of Wild Cherry. I got a bottle, and before it was opened I had tried various other remedies, but got no relief until I began taking the Balmich. I can truly say I think it saved my life at that time. I would not be without it. For coughs or colds it is the best medicine I know. S. W. PEARSON, Engineer Vt. Central R.R.

CURE OF DISEASED LIVER.

Honesdale, Pa., June 10, 1859.

Mr. Seth W. Fowle, Sir: You are at liberty to use the following statement for the benefit of the afflicted.

I was down with the liver complaint, which apparently brought me to the brink of the grave. During the winter I was so sick that I was forced to give up all my work, and for several years I have not been able to enjoy good health. When I first tried Wistat's Balmich of Wild Cherry, I was not sure it would do me any good, but I have been able to get well again. I am now in better health than I have enjoyed for ten years. This statement may be relied upon as being true.

BETSEY FERRIN.

The above statement was given in the presence of Dr. A. Strong, of Honesdale, who is well known in his vicinity as a successful practitioner.
GENTLE FANNY RAE.

Author of "The Old Cabin Home."

OXYGENATED BITTERS

THE ONLY SURE AND SAFE REMEDY EVER DISCOVERED FOR THE CURE OF DYSPEPSIA, IN ALL ITS VARIOUS FORMS.

The present Proprietors of the OXYGENATED BITTERS will hereafter supply all demands for the same, at the old stand of SETH W. FOWLE, 188 Washington Street, the well known Head Quarters of Wistar's Balsam of Wild Cherry.

Nearly all of our best physicians acknowledge the merits of this truly great Remedy, while only those of second and third rate ability can be found, who, through envy, would detract from its well-earned reputation. These Bitters are the production of a thoroughly educated and well known physician, and are the result of long and careful study on his part to obtain relief for an invalid, who had suffered for many years as none but the incurable dyspeptic can suffer. His efforts were crowned with success, and thousands are now living who gratefully acknowledge that they owe their lives and comfort to this most valuable discovery. It was only at the earnest solicitation of influential friends, who had seen and felt the beneficial effects of these Bitters, that the doctor was induced to give them in this form to the public.

SETW W. FOWLE & CO.

BOSTON, MASSACHUSETTS,

PROPRIETORS OF

WISTAR'S BALSAM OF WILD CHERRY,

AND

GREENE'S OXYGENATED BITTERS.

All orders for Agencies must be accompanied by suitable references, AND WILL RECEIVE PROMPT ATTENTION.
