JOHN ANDREW
PRINTER, BOSTON.

TO OUR PATRONS.

WHEN men knew no almanac but the changes of the moon, the writing or publishing of this kind of Annuals was unknown; but since the idea of *lunacy* has generally vanished through the introduction of other modes of calculating time than lunar changes, the printed almanac has become as indispensable to circulate that knowledge which annihilates disease by scattering broadcast the proper remedies, as the knowledge of astronomy has demonstrated to us the importance of the sun above that of the moon, in giving far greater facility in measuring time.

With the return of the year, then, the sick, who have long been benefited by our Remedies, will demand our Almanac; and our wish to restore them from sickness to Health, from misery to Happiness, leads us cheerfully to respond to that demand.

Our remedies have been so long before the public, and their high value and their unrivalled success have rendered them so well known and so generally appreciated, that we need say but a few words of them in this place. It is only the *good* coin that is imitated; only the flimsy fabric that requires praise; so it is that the worthless compound or the gilded pill of the empiric must depend upon the unmerited commendation of its interested friends for its success. Not so with "*Wistar's Balsam of Wild Cherry*," or the "*Oxygenated Bitters*," which we furnish. They have stood the test of time. They have lived and been sought after by thousands, and conveyed new life and vigor into the worn down, diseased, and vitiated bodies and jaded minds of vast multitudes, while the vaunted quack specifics have risen in a day, and perished in a night, like the "angry prophet's gourd."

So it ever is; so it ever will be; every thing finds its proper level. The Medicine which is *good* will be esteemed and sought, while that which is worthless will soon be among the things "lost upon earth," and buried in oblivion. Where true Medical Science has been engaged, first, in ascertaining the nature of disease; and, secondly, the character and property of the *true* remedies; and when great Pharmaceutical skill has been exercised in combining various remedies according to the latest and truest discoveries of chemistry, so that, instead of neutralizing each other, (as they are often made to do with the ignorant and unskilful,) they harmonize and cooperate together, each aiding its fellow in removing disease, their permanent and lasting success will follow.

Hence it is that we continue, year after year, to supply the constantly increasing demand for these wonderful Medicines; and hence, also, the numerous Certificates, which, voluntary and unsolicited, pour in upon us, — a few of which we publish, — attesting the remarkable cures performed by these Remedies, from all portions of our fellow-citizens, from the halls of Congress to the humblest cottage, and even from beyond the seas; for their fame and their virtues have extended to the "utmost bounds of the earth," without any attempt on our part to introduce them beyond the limits of our own country.

To those who have already made use of our Remedies, no appeal is necessary. To the thousand of Invalids and Afflicted, — reduced to the last stage of suffering from having exhausted every remedy but the one adapted to their case, and who, in their extremity, have resorted to ours, and found in its use a Panacea for "all their woes," — and who have been restored to themselves, to their friends, and to a full appreciation of life and its enjoyments, and who, instead of calculating the value of existence, look to the future with hope and without apprehension, we *do* appeal with a pride and satisfaction consequent upon the knowledge that these changes have been effected by the use of our *Specialties*.

That our Medicines possess astonishing properties in warding off as well as in curing disease, in resuscitating the debilitated and sinking powers of nature, and giving to the pale and emaciated Dyspeptic and the wan and bloodless Consumptive, the ruddy hue and glow of health and the elastic and buoyancy of youth, is acknowledged wherever their merits have been known and their virtues tested.

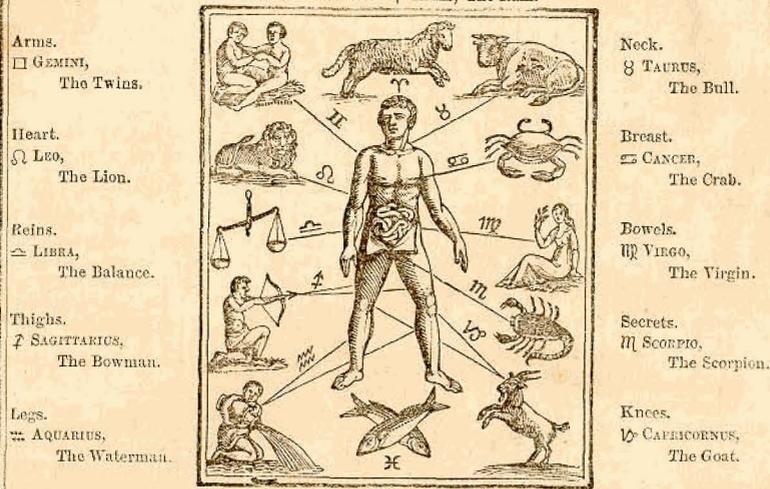

We might say much more of introducing this little messenger, our annual harbinger of Health and Happiness, to the numerous families of our land; but it is not necessary; for our motto has always been to let our Works, our Remedies, praise us, and not to praise ourselves. All we ask is, that you will "prove our medicines, and hold fast that which is good."

ECLIPSES.

In the Year 1858 there will be four Eclipses, two of the Sun and two of the Moon, viz.: —

- I. — A Partial Eclipse of the Moon, February 27, not visible in the United States.
- II. — An Annular Eclipse of the Sun, March 15, visible at Washington and Boston. Eclipse begins on the Earth in long. 26° 16' E. of Washington, at 4 h. 23 m. A. M., Washington mean time, and lat. 4° 23' S. Central Eclipse begins 5 h. 33 m. A. M., in long. 9° 16' E. of Washington, and lat. 11° 25' N. Ends 8 h. 19 m. A. M., but not visible at Washington.
- III. — A Partial Eclipse of the Moon, August 23; not visible at Boston and Washington.
- IV. — A Total Eclipse of the Sun, September 7. Eclipse begins on the Earth at 6 h. 26 m. A. M., Washington mean time, in long. 7° 45' W. of Washington, and lat. 7° 3' N. Central Eclipse begins at 7 h. 31 m. A. M., in long. 22° 51' W. of Washington, and lat. 5° 45' S. Ends at 10 h. 30 m., but not visible in these parts.

Morning Stars. — MERCURY, about February 7, June 7, September 30.

Evening Stars. — MERCURY, about April 20, August 18, December 13; VENUS, about October 3.

Balsam of Wild Cherry,

FOR THE PERMANENT CURE OF

CONSUMPTION!

AND ALL ITS INCIPIENT SYMPTOMS, SUCH AS
 Coughs, Colds, Hoarseness, Croup, Influenza, Bleeding of the Lungs, Liver Affections, Pains in the Breast or Side, Night Sweats, Phthisis, Inflammation of Lungs and Throat, Whooping Cough, Asthma, and all Bronchial Affections.

PULMONARY CONSUMPTION, from its having so long and so persistently baffled the skill of the physician, and defied his attempts to arrest its symptoms, has been termed, not inappropriately, the "opprobrium of medical science;" and, until within a very recent period, has been classed by the highest medical authority as a disease not only incurable, but as holding out no hope to the afflicted, and inducing, consequently, in the mind of its victim, the awful reflection that the grave only could terminate his sufferings. But the progress of science is onward; and medical knowledge is so rapid in its advancement that in this generation it undertakes the cure of diseases which, in the preceding one, it abandoned as incurable. In arriving at these great changes, or rather in accomplishing these revolutions, some new theory is advanced which utterly repudiates and explodes the acknowledged and settled practice of the past, and inverts positions previously received not only as tenable, but impregnable.

Minds that originate and proclaim truths that oppose the confirmed and long-established notions of those who have preceded them, and whose doctrines have been received as laws which should regulate society, seldom, if ever, live to participate in the benefits which they confer upon the race, if indeed they escape the sneers and ridicule of their contemporaries. But the good which men do lives after them.

When it was first proclaimed that Dr. WISTAR, as the result of his long investigations and intimate knowledge of the vegetable kingdom, added to his thorough ability as a theoretical and practical chemist, had discovered a Remedy which would not only relieve but actually cure that Scourge of our Race and Bane of our Climate, CONSUMPTION, it well may be believed that the fact was received not only with incredulity, but with derision. That a remedy should suddenly be presented to the public professing to cure a disease, to relieve which medical skill had exhausted itself in fruitless efforts, was more than even the credulous portion of the community could receive with confidence. But Dr. WISTAR knew the value of his discovery, and its amazing power in curing the long train of diseases whose termination, unless arrested by the proper remedy, is Consumption! At first it was only those who, having exhausted every known remedy without relief, and had become desperate by disease and suffering, who accepted the proffered succor, which they did with the same faith that a drowning man hopes for immunity from destruction in "catching at a straw." Its effect was so astonishing, its cures so surprising, that it at once "awoke to fame." Its virtues were soon "noised abroad." It did not take years to secure the confidence of the community—it was acquired in a day, and it has ever since maintained it. And though since its discovery years have rolled on, and "old things have passed away;" though remedies without number, in every shape and under every name, have been forced upon the public, and after a brief existence, by force of their intrinsic worthlessness, have "died and made no sign," the fame of "Wistar" still exists; is cherished by the afflicted as an inestimable cordial—as the true "Balm in Gilead." It is as effectual now as in the early date of its discovery. So long as Diseases of the Throat and Lungs exist and afflict our race, so long will our Remedy be demanded as applicable to their relief and cure. If, twenty years since the Balsam of Dr. Wistar was hailed by the Invalid as the only medicine which had restored the color to his blanched cheek, and vigor to his enfeebled frame, is it not now performing the same wonders? And will it not twenty years hence be hailed by our successors as the only remedy which had restored the sinking powers of their ancestors, and which will perform the same service for them when their enfeebled constitutions require it? "The thing which hath been shall be."

"Time, which is continually washing away the dissoluble Fabrics of other Medicines, passes without Injury by the Adamant of WISTAR."

First Month. JANUARY...1858. 31 Days.

Recommendations of Wistar's Balsam of Wild Cherry.

BLEEDING AT THE LUNGS CURED.

Seth W. Fowle, Esq. Dear Sir: Having been attacked with hemorrhage of the lungs, which left me with a troublesome cough and the usual debility consequent upon such an attack, and having cured myself by the use of "Wistar's Balsam of Wild Cherry," I feel it a pleasure and a duty to testify to its merits. My general faith in patent medicines is small; but for those who are suffering under pulmonary attacks, I am persuaded that the Balsam is an excellent preparation. Yours, very truly, JONA. R. CHILDS, Chicopee, Mass., Feb. 20, 1854.

Ex-Alderman Perkins sends us the following, in favor of Wistar's Balsam of Wild Cherry:—

Dr. S. W. Fowle. Dear Sir: For several days I had been suffering from the effects of a severe cold, accompanied by a very sore throat and sick headache, which completely incapacitated me for business. I had taken but a small portion of a single bottle of this Balsam, when I experienced immediate relief. My cough was broken up at once, and my lungs entirely relieved from the pressure which had become so painful. I attribute this entirely to the good effects of your Wild Cherry, as I took no other medicine whatever. I cordially recommend it to all my friends. Respectfully yours, SAM'L S. PERKINS.

The following Letter from Rev. Henry Wood, of Concord, N. H., late Consul to Beepoot, formerly Editor of the Congregational Journal, and now Chaplain in the U. S. Navy, speaks volumes in favor of Wistar's Balsam:—

Concord, N. H., March 2.

Mr. S. W. Fowle. Dear Sir: Two years ago, a sudden and violent attack upon my lungs confined me to my bed for several weeks; and when I recovered, I was so much oppressed by difficulty in breathing, that I was often unable to sleep or rest upon a bed by night. The suffering was extreme, and judging from the inefficacy of the remedies used, I supposed the disease incurable. Being persuaded to try a bottle of Wistar's Balsam of Wild Cherry, without the least confidence in its efficacy, I found the difficulty almost entirely removed before one bottle was used up. Having a mortal aversion to medicine, and seldom using it in any form, sympathy with my fellow-sufferers induces me to make this public statement, and recommend the article to others similarly afflicted.

With respect, yours truly,

HENRY WOOD.

Oxford, New Haven Co., Conn., Jan. 4.

Dear Sir: Having witnessed the effects of Wistar's Balsam of Wild Cherry, in the case of one of my neighbors, who has been for several years seriously afflicted with the phthisic, general pulmonary weakness, bleeding of the lungs, etc., I have been induced to ask you to send me some of the medicine. My neighbor, referred to above, lately had a violent attack of bleeding at the lungs, and distress in breathing. He tried a bottle of the Wild Cherry, which has produced a most salutary and favorable effect. At his instance, and several others laboring under like complaints, I have been induced to make this request. By attending to the above immediately, you will oblige the afflicted, and also

Yours, etc.,

HENRY DUNHAM.

DOMESTIC RECEIPTS, &c.

SNOW BREAD.—We find the annexed paragraph in one of our exchanges. It is curious, if true:—

All persons, where snow abounds, are not, perhaps, aware of the value of the fleecy flakes in making light, delicious, and wholesome bread. There is no "raising" in the world so perfectly philosophical as good, fresh, sweet snow; it raises bread or cakes as the best yeast, or the purest acids or alkalis, while it leaves no taint or fermentation like the former, nor injurious neutral salt, like the latter. Indeed, it raises by supplying atmosphere wherewith to puff up the dough, while the other methods only supply carbonic acid gas.

A DELICIOUS WAY TO PREPARE TOMATOES FOR THE TABLE.—Scald ripe tomatoes, peel and cut them up, and sweeten with sugar to the taste; add a very little salt.

PICKLES.—An excellent way to make pickles that will keep a year or more is to drop them into boiling hot water, but not boil them; let

them stay ten minutes, wipe them dry, and then drop into good, cold, spiced vinegar. Put them in tight jars, and place them in the cellar.

MADEIRA BUNNS.—Beat eight ounces of butter to a cream, to which add two eggs long beaten. Have ready fourteen ounces of flour, six ounces of lump sugar sifted, half a nutmeg, a teaspoonful of sifted ginger, and a large spoonful of caraway seeds, and, after mixing, work them well into the butter; beat it half an hour; then add a large wine glass of sherry. Bake in tin patty-pans, in a moderately quick oven.

TO BOIL POTATOES.—Let the potatoes be of a size; do not put them in the pot until the water boils. When done, pour off the water, and remove the cover, until all the steam is gone. Then scatter in half a tea-cupful of salt, and cover the pot with a towel. By adopting this plan, watery potatoes will be mealy. The above recipe is a very important one; but few know how to boil potatoes, and but a few of those who know practise it.

1, moderates still; 5, comfortable; 11, rain; 12, or snow; 15, pleasant for the season; 21, showers; 23, windy; 25, finer; 26 to 28, snow or rain.

Recommendations of Wistar's Balsam of Wild Cherry.

Its virtues have reached the "utmost bounds of the earth."

The following letter was received from Colonel Markham, of the British army, and shows the estimation in which the Balsam of Wild Cherry is held abroad:—

Pier Hotel, Isle of Wight, England, Sept. 30, 1850.

Sir: I have a daughter in a delicate state of health, who has, I think, received signal benefit from Dr. Wistar's Balsam of Wild Cherry, three bottles of which were sent her by her brother in Canada. Please put me up six bottles, and forward them by the first steamer to Southampton or Liverpool, as you may find most convenient, with any amount of the medicine you may be so good as to send me. We have searched London for it in vain.

Believe me yours, truly,
WM. MARKHAM.

The following certificate from S. A. Walker, Esq., well known in the region in which he resides, as an extensive real estate auctioneer, and whose advertisements of the estates sold by him are composed in a style so beautiful, poetical, and picturesque that he is familiarly known as the "George Robbins of America."

Brookline, February 5, 1854.

To Seth W. Fowle. My dear Sir: Having experienced results of a satisfactory character from the use of Wistar's Balsam of Wild Cherry, in cases of severe colds, during the past two years, I am induced to express the full faith I have in its renovating power.

I was first induced to try this medicine as an experiment, about two years ago, in connection with the strong recommendation of a friend, who was well nigh gone with consumption, and whose relief from the use of it satisfied me of its great value in cases of colds and decline, and most clearly demonstrating to my mind its great value as a restorative, that only needs a fair trial to insure a grateful demonstration from the public.

Your obedient servant,
SAMUEL A. WALKER.

And still another case of hereditary consumption cured by Dr. Wistar's Balsam of Wild Cherry; a father and sister of the restored having died of that insatiable disease:—

Clark Township, Brown Co., O., February 20.

General Western Agent for Dr. Wistar's Balsam of Wild Cherry. Dear Sir: Our family are predisposed to that terrible disease, consumption; my father and sister having died of that disease. I have also been predisposed to consumption, and about three years since, I was completely prostrated by it, and for weeks my life was despaired of. My physicians and friends all considered my case as hopeless, and requested me to prepare for death, for a few days at most would close my life. To alleviate my paroxysms of coughing, which were intensely torturing, and to assist my expectoration, which almost smothered me, my friends bought me one bottle of Wistar's Balsam of Wild Cherry, and commenced giving me a few drops at a time, as my coughing spells came on; and from the first I experienced relief, and obtained a little uninterrupted sleep, which refreshed me very much. From this time I began to gain strength and to improve rapidly; and, after a few days, I was enabled to take the Balsam of Wild Cherry regularly and in full doses. My appetite and my digestion became good, and to the astonishment of all that knew me, I recovered. It is to Dr. Wistar's Balsam of Wild Cherry, and that alone, under the blessings of Providence, that I owe my recovery. My health is now good; every vestige of that alarming complaint, consumption, that had for years attached to me like a horrible incubus, has been eradicated from my system, and I do most earnestly entreat all that are in the least predisposed to consumption, to make immediate trial of Dr. Wistar's Balsam of Wild Cherry, for I have full faith in its restoring them to health. Yours, JOHN BROOKS.

DOMESTIC RECEIPTS, &c.

AN ANT TRAP.—Procure a large sponge, wash it well and press it dry, which will leave the cells quite open. Then sprinkle over it some fine white sugar, and place it near where the ants are most troublesome. They will soon collect upon the sponge, and take up their abodes in the cells. It is only necessary to dip the sponge in scalding water, which will wash them out "clean dead" by ten thousands. Put on more sugar, and set the trap for a new haul. This process will soon clear the house of every ant, uncle and progeny.

TO CLEAN PAINT.—Never use a cloth, but take off the dust with a little long-haired brush,

after blowing off the loose parts with the bellows. With care, paint will look well for a long time. When soiled, dip a sponge or a piece of flannel into soda and water, wash it off quickly, and dry immediately, or the strength of the soda will eat off the color.

TO PICKLE ONIONS.—Take the small silver onions, take off the outside skin, the tops, and fibres; boil a strong brine, and, when cooled a little, pour it upon the onions; allow them to stand four hours covered; then strain them from the brine, peel off another skin, and then boil vinegar with ginger and pepper; pour it on the onions when the steam has subsided.

THE OXYGENATED BITTERS,

The only Remedy ever discovered for

THE RADICAL CURE OF

DYSPEPSIA,

IN ALL ITS FORMS,

Which are developed under the Symptoms of

Asthma, Heartburn, Pains in the Stomach, Habitual Costiveness, Acid Stomach, Headache, Loss of Appetite, Piles, Water Brash, Night Sweats, Flatulency, Nervousness, Liver Complaint, General Debility, Depression of Spirits, and Indigestion.

DYSPEPSIA or INDIGESTION exists when the stomach is incapable of performing its appropriate functions, of changing the received food into chyme. Whether the immediate cause of dyspepsia is to be sought in the debility of the muscular fibre of the organ, or in the defect or bad character of its secretions, is a question not easily determined in all cases. There is little doubt, however, that both causes usually coexist; the tendency of the food to the acetous fermentation seems to be the effect of the latter; while the tendency to distortion, and the difficulty with which the aliment is urged forward into the intestines, is a proof of the former. Other symptoms of dyspepsia, besides those already referred to, are oppression at the stomach after food is taken; a sense of weight and dragging about the limbs while the digestive process is going on; a sensation of gnawing, rather than hunger, felt whenever the stomach is empty; a disposition to sleep after meals; and, frequently, a dull, heavy pain about the head; a depression of spirits without any assignable cause.

Collaterally, dyspepsia is developed under the various symptoms at the head of our article: the modes in which it is induced are numerous; but, aside from these, it seems to be a disease indigenous to our climate, and peculiar to our countrymen. Whether incited by constitutional causes, or from the dietetic habits of our people, remains to be determined; but one thing is certain, — it does exist in a most frightful degree.

It is reasonable, then, that minds of an investigating character — that physicians, who have seen the terrible amount of suffering incident to the universal diffusion of the disease — should direct their attention to the discovery of some remedy which would relieve poor humanity from the incubus which presses so heavily upon it. It was in this spirit that the mind of Dr. Greene became interested, which resulted in his establishing a series of experiments, and finally producing this Remedy, which, after years of trial, seems to be the only acknowledged Specific for the cure of all who suffer from any of the disorders assignable to Dyspepsia or Indigestion.

No matter under what phase of its Protean character this disease appear, these Bitters take hold of it, repelling it forcibly from the system; renewing the vital powers of the sufferer, and restoring his long lost vigor; accomplishing this at once, without the long delay and "hope deferred" process usually required to relieve all chronic affections.

In conclusion, we submit that this is a Medicine which has made its way into public favor, solely upon the basis of its own merits; that the cures it has performed, and the good it has accomplished, justify the appellation it has generally received as the

GREATEST SPECIFIC OF THE AGE.

CAUTION. — Remember that the GENUINE Wistar's Balsam has the WRITTEN signature of I. BUTTS on the Wrapper; all other is not only spurious, but worthless and deleterious. ☞

IMPORTANT TESTIMONY IN FAVOR OF THE OXYGENATED BITTERS.

From our numerous CERTIFICATES of the cures effected by the use of the OXYGENATED BITTERS, we select a few.

From the Boston Evening Gazette, April 11, 1857.

A CURE FOR DYSPEPSIA.—If human testimony amounts to any thing, then has a cure been found for Dyspepsia. None but those who have suffered all the miseries of this disease can fully appreciate the value of a medium that can cure it. The *Oxygenated Bitters* have proved eminently successful in some of the worst cases which we have ever known. Names of the highest respectability are daily offered to the proprietors, a few of which only can be published in our limited space.

The following, from a well-known contractor, of New York city, presents a strong case:—

Brooklyn, N. Y., April 7, 1857.

To Messrs. Seth W. Fowle & Co., 133 Washington Street, Boston, Mass: For nearly eight years past I have suffered severely by repeated attacks of Dyspepsia, of the worst kind. Last fall I commenced using Dr. Greene's *Oxygenated Bitters*, and after taking six bottles, according to directions, I found myself *entirely cured*. I am very happy to say that I never enjoyed better health in all my life than I have for the last three months. Should I be so unfortunate as to be again afflicted with the same distressing complaint I would pay five dollars a bottle for the *Oxygenated Bitters* if I could not procure them for less.

Yours respectfully,

FRANCIS C. CHAMPNEY.

Clyde, Wayne Co., N. Y., March 10, 1857.

Messrs. S. W. Fowle & Co.: I am happy to state that I have used the *Oxygenated Bitters* in my practice for the last three years in the treatment of Dyspepsia, General Debility, Indigestion, and Affections of the Liver, with the most satisfactory results; and would cheerfully recommend to those suffering from these distressing diseases to give this valuable medicine a trial.

Respectfully yours,

J. E. SMITH, M. D.

Grove, Elbert Co., Ga., April 4, 1857.

Messrs. S. W. Fowle & Co.: Having last September procured four bottles of the *Oxygenated Bitters*, I have made use of them in my practice to my full satisfaction. If you had an agent in this county it would be the means of placing this very valuable medicine within the reach of many who are now compelled to go without it from the difficulty in obtaining it in this region.

Respectfully yours,

C. H. GORDON, M. D.

Salem, Mass., April 16, 1857.

Messrs. S. W. Fowle & Co.: Having been for many years troubled with a disease pronounced by physicians *Dyspepsia*, and having tried various remedies without any favorable result, I was induced, in consequence of having perused a pamphlet accidentally thrown in my way, to try the *Oxygenated Bitters*. I procured a bottle from Mr. Emerson, your agent in this city, and very soon had the satisfaction of proving the medicine what it purports to be—a *cure for Dyspepsia*. I have ever since enjoyed perfect health, and have recommended the *Bitters* to many of my friends, who have used them with like success.

BENJAMIN WEBB.

Extract of a Letter from a Clergyman to a distinguished Physician in Boston.

East Taunton, March 2, 1857.

Dear Doctor: The *Oxygenated Bitters* which you sent me have been of great benefit. Indeed, taking most of my time, I am better than I have been for years. The wine I have been taking I have discontinued, as not assisting the wonderful powers of the *Bitters*. It seems to me that under their influence I am fast regaining my lost health, and soon shall be completely restored.

FEES PAYABLE AT THE PATENT OFFICE.	
Patent fee for a citizen of the U. States, or for a foreigner who has resided here one year and made oath of his intention of becoming a citizen.....	\$30 00
For a subject of Great Britain.....	500 00
All other foreigners.....	300 00
For entering a caveat.....	20 00
For entering an application for the decision of arbitrators, after notice from the commissioner that the invention is not new or that it interferes with a pending application.....	25 00
For extending a patent beyond the fourteen years.....	40 00
For recording each assignment or transfer of patent.....	3 00
For adding the specification of subsequent improvement.....	15 00
For surrender of an old patent to be reissued, to correct a mistake of the patentee.....	15 00
In case of reissues, for every additional patent.....	30 00
For a disclaimer.....	10 00
For copies of patents, or any other paper on file, for each 100 words.....	10 00

IMPORTANT TESTIMONY IN FAVOR OF THE OXYGENATED BITTERS.

LETTER FROM AN EMINENT PHYSICIAN.

To such of our readers as are troubled with *Dyspepsia*, or kindred complaints, we commend the following letter from a well-known Physician of Massachusetts, in favor of the *Oxygenated Bitters*. This is certainly a remarkable Medicine, if the half we have heard said in its praise be true; and we have no reason to doubt it, when the names of such men as Dr. Porter are given to the public as vouchers. — *Portland Gazette*.

Haverhill, Mass, June 1, 1856.
S. W. Fowle & Co. Gentlemen: While suffering from *Dyspepsia* some years since, and trying almost every thing for its removal without any benefit, I was accidentally led to make use of the *Oxygenated Bitters*, and after a short trial of them found my health improving, and in time my disease radically removed. Since then I have used them in my practice, and generally with good success. I know of no medicine so well adapted to the cure of *Dyspepsia*, in many of its aggravated forms. I have seen the most stubborn cases, which had resisted almost all the preparations commonly used for indigestion, yield, as by magic, upon the administration of a few doses of these Bitters. Such results have increased my confidence in their medicinal powers, and strengthened my convictions of their superiority over all other instrumentalities, in the treatment of the complaints for which they are recommended.

I would certainly advise those troubled with *Dyspepsia* to use the Bitters; and I am confident that all who do so will reap great benefit, if there is nothing to contra-indicate their use.
A. R. PORTER, M. D.

COPY OF A LETTER FROM THE HON. DAVID HOOD.

Thompsonville, Conn., September 14, 1855.

Messrs. Seth W. Fowle & Co., Boston. Gentlemen: Having been signally benefited by the use of your *Oxygenated Bitters*, I am glad to make a public acknowledgment of the fact, believing, as I have good reason to do, that no other remedy ever offered for the cure of *Dyspepsia*, or other derangements of the stomach, possesses equal merits. I suffered for a period of more than twelve years with pain in the side, water brash, vomiting after eating, costiveness, &c. My physician attributed my troubles, in part, to the too free use of tobacco. He could not reach my cure.

I applied to several others, but with the same want of success. I could get no permanent relief from any source. I had often heard your *Oxygenated Bitters* favorably spoken of, but not until despairing of ever regaining my health did I commence using it. To my surprise I began immediately to improve, and a few weeks' continuance of the use of the medicine completely restored me to good health. I can recommend your Bitters with much confidence for all diseases of the stomach.
Yours with much respect,
(Signed) DAVID HOOD.

OXYGENATED BITTERS IN EUROPE.

From Rev. L. Doolittle, a highly respectable Clergyman.

Paris, November 1, 1852.

Dear Sir: About two years since I made use of a few bottles of your *Oxygenated Bitters* for a stomach complaint, which was at that time relieved.

Since my stay in England and France, I have found my old enemy, irritability of the stomach, returning again. I have not found any prescription to afford me relief, and I made inquiries in London for your *Oxygenated Bitters*, but could not find any. I write now to beg you will do me the favor to send by the earliest steamer to Havre half a dozen bottles.

An old friend of mine in England, Captain Jackson, of the British army, I found, on my arrival, suffering from Asthma, manifestly the result of *Dyspepsia*. Send an additional half a dozen bottles. I should like to have the captain try the medicine.

I am not aware that my name is known to you. I have been the resident clergyman for some twenty-three years, in Sherbrooke and Lennoxville, Canada East, to which charge I hope to be able to return in the spring. I remain your ob't serv't, L. DOOLITTLE.

A MODE OF COMPUTING INTEREST. — Multiply the sum by the number of days; that product, being divided by 6, will give the interest in mills; then strike off the right hand figure.

EXAMPLE.

200 dollars.
12 days.

Divide the product by 6) 2400 (400] cents.
If 7 per cent. is required, add to 6 per cent. its one sixth.

THE MILITIA. — The militia force of the United States, as near as can be ascertained from official reports, consists (1856) of 49,764 commissioned officers, and 1,873,558 non-commissioned officers, musicians, artificers, and privates; making a total of 2,107,626 men.

THE MARINE CORPS. — The marine corps has the organization of a brigade, and consists (1856) of 13 captains, 19 first and 20 second lieutenants, and about 1200 non-commissioned officers, musicians, men, &c.

Sixth Month.

WISTAR'S BALSAM

A REMEDY FOR DIARRHOEA AND DYSENTERY.

We have never claimed for the BALSAM remedial qualities for any other diseases than those for the cure of which it has attained its reputation as the "GREAT REMEDY." But we consider it our duty, at this late day, to make known that for those complaints which may be classed under the head of *Diarrhoea*, *Dysentery*, and *Summer Complaints*, it possesses the same healing, anodyne, and curative properties that it does for those diseases in curing which its present celebrity has been attained.

A CURE FOR WHOOPING COUGH.

St. Hyacinthe, Canada E., Aug. 21, 1856.

Messrs. Seth W. Fowle & Co. Gents: Several months since a little daughter of mine, ten years of age, was taken with whooping cough in a very aggravated form, and nothing we could do for her seemed in any way to relieve her suffering. We at length decided to try a bottle of your Dr. Wistar's Balsam of Wild Cherry. In three hours after she had commenced using it, she was greatly relieved, and in less than three days was entirely cured, and is now well. I have since recommended the Balsam to many of my neighbors, who have used it, and in no case have I known it fail of effecting a speedy cure.

You are at liberty to make any use of the above you think proper. If it shall induce any body to use your Balsam I shall be glad, for I have great confidence in it.

Yours, P. GUILTE, Proprietor of the Courier de St. Hyacinthe.

SCURVY CURED BY THE OXYGENATED BITTERS.

This dreadful disease is generally confined to those who pursue a seafaring life, and who, from long deprivation of fresh food, are reduced to the necessity of subsisting upon salted provisions. Were the OXYGENATED BITTERS at hand in such cases the ravages of the disease would at once cease by their use. The great tonic properties, added to the acescent nature of the Bitters, at once cause the disease to disappear, while at the same time they restore the patient to his usual strength.

No voyage, of any length, should be undertaken without a supply of this invaluable Remedy, which retains its virtues unimpaired in the heat of the tropics or cold of the arctic.

SEA SICKNESS.

(*Nausea Marina.*)

The nausea at sea, and the retchings and vomitings experienced at sea by those unaccustomed to sea life, — caused sometimes by the motion of the vessel, and sometimes by the disordered state of the stomach, — can be at once removed, the stomach restored to a healthy and natural tone, appetite induced, and the whole man fitted to enjoy the "romance of the sea," by the use of the

OXYGENATED BITTERS.

From the Greenfield Gazette and Courier, March 30, 1857.

OXYGENATED BITTERS. — It is not often that we have much faith in the patent medicines advertised, or recommend their use to our readers; but, having given the Oxygenated Bitters advertised in our columns a fair trial, and been greatly benefited by their use, we can, with confidence in their efficacy, recommend them to such of our readers as may be afflicted with that *horrible* disease, the *dyspepsia*, or any derangement of the stomach or digestive organs. We have been for years more or less affected with dyspepsia, but early last summer were attacked with it in its worst form. We tried several remedies, but none of them did us any permanent good. We at last purchased a bottle of the Oxygenated Bitters; and, before we had taken it up, the disease and all of its symptoms disappeared, and although we have since paid no regard to our diet, but partake as freely of any and all kinds of food as any member of our family, we have not had a return of dyspeptic symptoms more than three or four times, and then they would again immediately disappear upon taking a dose of the Bitters, of which we keep a bottle on hand.

Wistar's Balsam of Wild Cherry.

RECOMMENDATIONS.

Messrs. S. W. Fowle & Co. Gents: It is now some four months since that I was attacked with a severe bronchial affection, which reached my lungs and throat generally, causing severe suffering and inflammation. I tried many remedies without the slightest relief, when my attention was called to an advertisement of "Wistar's Balsam." I was induced to try it, and my relief was immediate. I am now taking the second bottle; and, in view of the great help I have received from your specific, cannot refrain from expressing my gratitude to the inventor of this valuable medicine.

Frankfort, Herkimer Co., N. Y., April 15, 1857. — Messrs. S. W. Fowle & Co. Gents: Above I send you a Certificate from G. A. Kenyon. Your Medicine is giving general satisfaction. It sells better than any other. Yours, truly, E. F. HOWELL.

Messrs. S. W. Fowle & Co., Boston. Gents: We have sold your Balsam for more than ten years. We always recommend it to any one suffering from a cold, cough, or any lung or throat complaint. We introduce it by saying to our customers, "Take it; try it; and if, after using half a bottle, you say it is not worth the money, return it." We never had a bottle returned. We send you a certificate from C. Kirkwhite, Esq., who is a gentleman extensively known and universally respected. Yours, truly, Madison, N. Y., March, 1857.

Messrs. S. W. Fowle & Co., Boston. Gents: It is a pleasure to me to acknowledge the virtues of Dr. Wistar's Balsam of Wild Cherry. My case has for several years been pronounced one of "incurable consumption." Wistar's Balsam was recommended. I have used it; and it has been a source of incalculable relief to me. I think it the best remedial agent in the patent medicine vocabulary for lung or throat complaints. Although not desirous of becoming notorious as pushing your specific, I feel sustained in recommending this to all suffering from coughs or colds. Yours, C. KIRKWHITE.

The following Letter, just received by the Proprietor of Dr. Wistar's Balsam, from a well-known Physician in Pennsylvania, shows the high estimation in which this Preparation is held where it is best known:—

Messrs. S. W. Fowle & Co., Boston. Gentlemen: Please forward to me, without delay, by Adams & Co.'s Express, three bottles of Wistar's Balsam of Wild Cherry, for which I enclose the money. I procured one bottle in this place, which was all I could find. This I have given to a patient, who has received so much benefit from its use that I am anxious to continue it.

Why do you not establish an agency for the sale of the Wild Cherry in this place? It would find a ready sale. Yours, respectfully, A. HARSIBERGER, M. D. Perryville, Juniata County, Pa., March 10, 1857.

Dr. Seth W. Fowle, Boston, Mass. Dear Sir: I feel it to be due to you to say, that a young lady, a member of my family, had been suffering for several years under a bronchial affection, and the disease had made such progress, notwithstanding the best medical aid had been consulted, that great fears were entertained that the disease with her, as with so many others, might speedily terminate in death. I was induced, through the persuasion of a friend, to try your Dr. Wistar's Balsam of Wild Cherry; and, after she had taken three bottles, she felt entirely relieved of the attack. Yours, J. F. M'JILLTON.

DOMESTIC RECEIPTS, &c.

TO PRESERVE APPLES.—If apples are immersed in grain of any kind, they will keep good all the year round, and the grain will not in any way be the worse for it. This does not need any preparation or expense, as the apples may be put into a corn bin or into a tub, and the corn intended for food for horses or poultry may be stored in this way as any other.

TABLE BEER FROM SUGAR.—To four pounds of coarse brown sugar add ten gallons of water, then put in three ounces of hops, and let the whole boil for three quarters of an hour, and work it as usual. It should be kept a week or ten days before it is tapped, when it will improve daily afterwards within a moderate time of consumption.

CAUTION.—Remember that the GENUINE Wistar's Balsam has the WRITTEN signature of I. BUTTS on the Wrapper; all other is not only spurious, but worthless and deleterious. [L]

Eighth Month. AUGUST....1853.

31 Days.

For Couverts, use Wistar's Balm.

TO DYSPEPTICS AND CONSUMPTIVES!

A Distinguished Physician and Writer on Physiology, having long observed the Merits of our Preparations, as well as having tested their Virtues from personal experience, writes us as follows:—

WISTAR'S BALSAM OF WILD CHERRY.

GREENE'S OXYGENATED BITTERS.

It is now the opinion of the best physicians, both in this country and in Europe, that Consumption begins in Dyspepsia; that the whole system becomes diseased before its development in the lungs. This was the opinion of the immortal *Rush*, who calls "Consumption, a disease all over," and is now the opinion of *Dr. Hughes Bennett*, who has had greater opportunities for examining this disease than any other living man; and of *Sir James Clark*, physician to Queen Victoria. This opinion is, beyond doubt, a correct one. All remedies, then, when *Dyspepsia* first shows itself by *general debility, costiveness, flatulence, liver complaint, sour stomach, &c.*, must be calculated to remove this general prostration of the whole system. Now, there is no remedy known to be so efficacious in removing this general disease — this total prostration of the whole man, as the *Oxygenated Bitters*. They attack the disease in its citadel, by reviving the sinking powers of the patient; by restoring lost appetite, correcting acidity, purifying and strengthening the gastric juice, and rendering it capable of properly and thoroughly dissolving the food, thus forming healthy *chyme* and *chyle*, and preparing the absorbents to take up the nourishment and carry it into the system, thus renovating the old and crazy machine by new modelling and purifying the whole mass of blood. In a word, it can be shown from hundreds of certificates, from the most eminent and reliable persons, that there is no medicine calculated to pour oil into the exhausted lamp of life like the *Oxygenated Bitters*.

Let all, then, when health first begins to fail; when the vital powers first seem to be giving way; when appetite first begins to fail, and the nerves to tremble; when the man, instead of being refreshed and invigorated by sleep,

"Tired nature's sweet restorer,"

finds himself more weary in the morning than when he went to bed at night, — let him delay no longer, but at once commence taking your *Bitters*. He will soon find, as I have, the flagging powers of nature reviving, and general health returning. But it is unnecessary to say more, as no one can know the value of this medicine till he tries it.

Still, if any have passed this dyspeptic period of the disease, and feel their lungs now beginning to fail, they should lose no time before taking the *BALSAM*. This must then be laid hold of as their *Sheet Anchor*.

MESSRS. S. W. FOWLE & Co.

Gentlemen: The two great Diseases which destroy the happiness and comfort of individuals and families, and bring down to an early grave a larger number of men and women in our country than any, or, perhaps, all others, are

CONSUMPTION

— AND —

DYSPEPSIA,

or Indigestion. For the former of these, Consumption, you have for many years furnished the best and most efficacious Remedy in the form of "*Wistar's Balsam of Wild Cherry*." But of this we are not now to speak particularly, save only to say that it still holds the front rank of all medicines for *Diseases of the Lungs*, as it has heretofore done.

Ninth Month. SEPTEMBER...1853. 30 Days.

Greene's Oxygenated Bitters.

OPINIONS OF THE PRESS.

There is no class of our fellow-citizens whose opportunities are more ample to test the value of any specific presented to the public for the cure of many of the diseases which afflict humanity, or more ready to give public expression and sanction, when confirmed by observation and experience, of the merits or demerits — the value or worthlessness — of such medicine, than that connected with the Press.

Our testimony from this influential source is ample enough to fill a volume; but as an expression of the whole, we subjoin a few of these opinions.

From the Ellenville (N. Y.) Journal, April 30, 1857.

OXYGENATED BITTERS. — As a remedy for **DYSPEPSIA** and **GENERAL DEBILITY**, this popular medicine, we believe, stands unrivalled. It has an almost world-wide celebrity. The Editor of the *New Hampshire Patriot and State Gazette* bears the following decided testimony as to the merits of this excellent, popular medicine: —

"Having suffered for several years with a confirmed *Dyspepsia*, the junior partner of this paper has been led to make a trial of the *Oxygenated Bitters*, with results so satisfactory to himself that he is induced to commend them to the public as a palliative and cure of indigestion and its thousand concomitant evils. Several gentlemen of our acquaintance in this vicinity have already made successful use of this medicine, and join us in its cordial recommendation."

From the Boston Olive Branch, April 25, 1857.

A REMEDY FOR DYSPEPSIA. — None except those who have suffered all the miseries of *Dyspepsia* in its various forms, can appreciate the value of a medicine that will cure this disease. To all who would find a remedy, we say, try the *Oxygenated Bitters*. The efficacy of this medicine in cases of *Dyspepsia*, *Asthma*, and *General Debility* has been attested by many citizens who are well known to the public, and whose statements can be relied upon. The *Bitters* have been tested by scientific men of unquestionable authority, and proved to combine the most valuable tonic properties. Being free from alcohol, no reaction is suffered by the most delicate constitutions. A medicine scientifically and skilfully compounded, which makes no undue pretensions, and is recommended by citizens of the highest respectability, deserves the patronage of the public. Such a medicine is the *Oxygenated Bitters*.

THE ARMY. — The authorized strength of the United States army is 17,867, officers and men; the actual strength, 15,752. The number of enlistments for the year ending September 20, 1855, was 10,546; loss by deaths, discharges, and desertions, 5,500. The whole territory of the United States is divided into five great departments, in which there are 26 arsenals and 98 forts, most of which are garrisoned.

THE NAVY. — The navy of the United States has (1856) 68 captains, 7 of them commanders of squadrons, 97 commanders, 11 ships-of-the-line, 13 frigates, 19 sloops of war, 3 brigs, 27 steamers of various sizes, including those now being built, 5 store ships, 2 permanent receiving vessels, a naval asylum, a naval academy, and 8 navy yards.

Oxygenated Bitters.—Opinions of the Press.

North Western Home Journal Office, Chicago, Ill., Nov. 7, 1856.

Messrs. S. W. Fowle & Co., Boston. Gentlemen: Your *Oxygenated Bitters* should be better known in the Western Country, for we have among us thousands who are suffering from Dyspepsia. I feel that I am indebted to your Bitters for my recovery from this awful disease. My habits at this time were sedentary; and my complaint was aggravated by too close confinement. I despaired of relief, and considered myself a hopeless dyspeptic. I concluded to try the *Oxygenated Bitters*, and a wise conclusion it proved to be. I have taken, in all, four bottles, and I am cured. Although rather a small man, my present weight is 160 pounds. Your Bitters need only to be known to have a very extensive sale in this section of the country. Respectfully, &c. J. B. MERWIN, *Ed. Journal.*

THE RIGHT SORT OF EVIDENCE.—The following testimonial to the value of the *Oxygenated Bitters*, we extract from the *Burlington Sentinel*, edited by John G. Saxe, Esq. Mr. Saxe had for a long time labored under a series of complaints induced in part by indigestion; and, by a moderate but continued use of the Bitters, was restored to a degree of health to which he had been a stranger for years. This is but one of a thousand cases that are constantly occurring. They stamp the Bitters as one of the very best compounds ever prepared. Hear what the poet, editor, and lawyer, Saxe, says:—

“**OXYGENATED BITTERS.**—While many persons are, doubtless, over credulous in regard to patent medicines, others err, on the other side, by being over sceptical. The truth is, that, in regard to medicine, as in respect to other things, no worthless article can attain high popularity; but if a medicine has intrinsic value, it is sure to find favor if properly brought before the public. Among the few really valuable remedies are the famous ‘*Oxygenated Bitters*.’ This we know by having used them for indigestion with the best results, by the acknowledgments of physicians, and by their general popularity. We can, therefore, conscientiously recommend them for the complaints which they profess to cure.”

From the Watchman and Observer, Richmond, Va.

The *Oxygenated Bitters* is a very valuable medicine for Dyspepsia and a variety of other complaints.

From the Congregationalist.

OXYGENATED BITTERS.—We have never knowingly recommended or advertised a quack medicine, and we speak favorably of these Bitters only under a conviction that they are really and highly useful. The certificate of such a man as Prof. A. A. Hayes, M. D., State Assayer, is enough, we should think, to save this medicine from all suspicion of quackery or deception. He says: “The composition of these Bitters includes those medicinal substances which experienced physicians have long resorted to for special action on the system when deranged by fevers, dyspepsia, general debility, &c.” This medicine, as is well certified, contains no alcohol, and no metallic salts. Its value, and the truth of the statements made respecting it, may be further inferred from the names of many distinguished gentlemen.

The following Testimonial is from a New York Paper.

OXYGENATED BITTERS.—An intimate friend of ours has for years been afflicted with all the accumulated evils of a confirmed Dyspepsia—a complaint which he characteristically describes as “Protean in its forms and Pandorean in its effects.” He was nearly unfitted for mental and bodily exertion, life, at times, being an almost insupportable burden. He had gone the rounds of the ‘*pathies*, without experiencing permanent relief. He had lived on low diet, and sometimes on almost no diet at all, until he had become but the shadow of his former self. Happening to drop in upon us one day last summer, we presented him with a bottle of the *Oxygenated Bitters*, not because we had faith in its power, but because he had tried every thing else, and we wished him to leave nothing untried. He took it, as he had tried every thing else, and we wished him to leave nothing untried. He took it, as much to oblige us as for any other reason, and he now writes, “Before half of the first bottle had been used, a blinding headache, to which I have been long subject, departed, my appetite returned, and what is better, digestion returned with it. I have continued to use it ever since, from time to time, and am recovering my wonted fullness of flesh, and enjoy a buoyancy and elasticity of spirits that renders life itself an exquisite delight.” He wished us to say thus much for the benefit of those who are similarly afflicted. We are no friend to patent nostrums, but can heartily recommend this to our readers.—*Cossackie Union.*

DOMESTIC RECEIPTS, &c.

FINE BLACKING FOR SHOES.—Take four ounces of ivory black, three ounces of the coarsest sugar, a tablespoonful of sweet oil, and a pint of small beer; mix them gradually cold.

TO MAKE PLANNELS KEEP THEIR COLOR, AND NOT SHRINK.—Put them into a pail, and pour boiling water on, letting them lie till cold, the first time of washing.

Recommendations of Wistar's Balsam of Wild Cherry.

CONSUMPTIVE PATIENTS

Will please read the following statement from the Harrison Gazette.

The incredulous are invited to read the following note from Rev. Mr. Coldron, whose character for truth and veracity stands above suspicion, and have their doubts dispelled as to the superiority of Wistar's Balsam of Wild Cherry over all remedies now before the public, of the same character.

Corydon, Ind., January 28.

It is no less a duty than a pleasure to state, for the benefit of the afflicted, that I consider Wistar's Balsam of Wild Cherry a great blessing to the human race. Having tried it in a case of severe affection of the lungs, I unhesitatingly recommend it to those similarly afflicted, as the best remedy I have ever tried, and one which cured me when physicians said I must die, and when I thought myself that my time to depart was near at hand.

WILLIAM COLDRON.

Two Lives saved by the Use of only three Bottles of Wistar's Balsam of Wild Cherry.

Mount Eden, Ky., July 24.

Gents: The Dr. Wistar's Balsam of Wild Cherry that I bought of you, has been of such signal benefit in my family, that I wish to make its virtues known to the public.

My wife took cold at the time of her confinement, which settled on her lungs. The physicians pronounced her disease consumption. She had profuse night sweats, and had coughs; she was given up, for we despaired of her recovery, and her child partook of her complaint. She then commenced taking Wistar's Balsam of Wild Cherry, and three bottles effected an entire cure with her and the child both.

I have no doubt that they would have now been in their graves if they had not used Wistar's Balsam of Wild Cherry.

SETH R. SEARCY.

Seth R. Searcy, the writer of the above certificate, is a man of as much veracity as any in this country, and a man of good judgment, and we place entire reliance on his statement.

HARCOURT, HOWARD & CO.

BRONCHITIS AND COUGH CURED.

Boston, August 15.

Mr. S. W. Fowle. Dear Sir: Having been troubled for a considerable time with a bad cough and bronchial affection, I was induced to try a bottle of Dr. Wistar's Balsam of Wild Cherry, which I am happy to say entirely removed the difficulty. I deem it but justice to say thus much for the benefit of those who may be similarly afflicted.

GEORGE H. DAVIS,

Firm of Hallett & Davis, Piano-Forte Manufacturers, Boston.

I hereby certify that I am personally acquainted with George H. Davis, Esq., and have the fullest confidence in the above statement.

H. G. BARRUS, Practising Physician.

Such testimony can be relied upon. Boston, Aug. 15.

DOMESTIC RECEIPTS, &c.

VIRGINIA CORN BREAD.—Dissolve one tablespoonful of butter in three and a half pints of boiling milk; into this scald one quart of Indian meal; when cool, add a half pint of wheat flour, a little sugar, a teaspoonful of salt, and two eggs well beaten; mix well together, and bake in two cakes; this well greased or buttered.

FRUIT CREAMS.—Take a half an ounce of isinglass, dissolved in a little water, then put one pint of good cream, sweetened to the taste; boil it; when nearly cold, lay some apricot or raspberry jam on the bottom of a glass dish, and pour it over. This is most excellent.

TO MAKE VINEGAR.—Boil slowly for one hour three pounds of very coarse brown sugar in three gallons of water, work it with a little yeast, the same as you would beer; then put it into a cask, and expose it to the sun, with a piece of brown paper pasted over the bung-hole; and it will soon become fine vinegar, fit for pickling or any other purpose.

TO MAKE HENS LAY.—If a teaspoonful of cayenne pepper is given to a dozen hens with

their food every other day, winter and summer, the quantity of eggs they will produce will be nearly doubled. So says Dr. Hall.

TOMATO KETCHUP.—Slice the tomatoes, and put a layer into a jar, sprinkle salt over it, then another layer of tomatoes and salt, until the jar is full. Stir the contents now and then for three days, keeping the jar in a warm place by the fire. Then allow it to remain untouched for twelve days; then press the juice from the tomatoes, and boil it with mace, pepper, allspice, ginger, and cloves, about two ounces in all to a quart of juice, a few blades of mace, twelve cloves, a spoonful of pounded ginger, and the remainder pepper and allspice. In three months boil it again with fresh spice.

TO PRESERVE EGGS.—If you take the eggs as soon as the hen has laid them, and smear the shells with lard or butter, they will keep as good as new-laid eggs for some time; but if you rub the shells with butter at any time, it will keep them good for months, and will prevent their being hatched.

GREENE'S OXYGENATED BITTERS.

THE LATEST TESTIMONY.

From the Norfolk County Journal, June 16, 1857.

DYSPEPSIA.

This troublesome, obstinate, and often dangerous disorder, no matter of how long standing, readily yields to the wonderful panacea of Dr. Greene, of Windsor, Vermont,—“THE OXYGENATED BITTERS.”

Every one knows that Dyspepsia is cousin to almost all the physical, and some of the mental diseases to which human flesh and mind are heir; and every one ought to know that, unless arrested, it will result in consequences the most serious; and, too, every one ought to be made aware of the fact, that the Oxygenated Bitters are a pleasant, safe, and sure remedy for it. We are in possession of reliable data upon which we found the assertion.

Copy of a Letter from a School Teacher in Detroit.

Detroit, Mich., June 16, 1857.

Messrs. S. W. FOWLE & Co., BOSTON: In reference to the OXYGENATED BITTERS, I can say, that after having the Dyspepsia for several months, and almost dying with pain and heaviness in my stomach, I was prevailed upon by a friend who had been cured by the same medicine to try a bottle of Greene's Oxygenated Bitters. Before using half a bottle I felt greatly relieved, and by the time I had used two bottles and a half I was entirely well, and still remain so. I know of several cases more distressing even than my own, which have been entirely cured by this invaluable medicine; and it gives me great pleasure to recommend it to any and all who may be suffering from this dreadful malady.

W. A. BACON, Teacher of Detroit Select School.

From the Savannah (Ga.) Republican, June 10, 1857.

There is no more harassing disease known than Dyspepsia. It upsets the entire frame, affecting the mind as well as the body. A sure remedy has long been sought for, but until lately, we believe, without avail. Messrs. T. M. Turner & Co. have the OXYGENATED BITTERS for sale, which are said to give early and permanent relief. Besides being a remedy for this distressing complaint, they are a pleasant, healthful, and invigorating summer drink, and are made without the use of alcohol.

If a man gives a bad title to land, he is a rogue indeed.

“I SEE through it now,” as the beggar said when a stone was cast directly through the hat he was holding in his hand for alms.

Why is a cowardly soldier like butter? Because he will run when exposed to fire.

WHAT grows less tired the more it works? A wagon wheel.

Why are energetic men like emetics? Because you can't keep them down.

“I'VE got into an awful scrape,” as the chin said to the blunt razor.

“O, I pant for glory, I pant for renown,” said a rascal son of genius to his friend. “Well, if you've a pair of pants, you'd better put them on,” was the cool reply of a bystander.

Why are country girls' cheeks like well printed cotton? Because they are warranted to wash and keep their color.

They say that woman has found her true “sphere” at last. It is about twenty-seven feet round, and is made of hoops and crinoline.

A NEW umbrella has been manufactured in Connecticut, called the “lending umbrella.” It is made of brown paper and willow twigs, intended exclusively to accommodate a friend.

THE SECT HE BELONGED TO.—“Sir,” said a little blustering man to a religious opponent, “to what sect do you suppose I belong?”—“Well, I don't exactly know,” replied the other, “but, to judge from your size and appearance, I should think you belonged to the class generally called *in-sect*.”

An Irishman was challenged to fight a duel, but declined, on the plea that he did not wish to leave his old mother an orphan.

“DOCTOR, do you think tight lacing is bad for the consumption?”—“Not at all; it is what it lives on.” The doctor's reply was wise as well as witty.

They dress cool down east. A lady, being asked if she would not wear a bonnet to church, replied, that she wouldn't “wear any thing else.”

“CATO, what do you s'pose an de reason dat de sun goes down towards de souf in de winter?”—“Well, I dunno, Sambo, unless he no stan' de clemency of de norf, and so he an' 'bliged to go to de souf, where he 'spériences warmer longitude.”

A POPULAR writer, speaking of the proposed oceanic telegraph, wonders whether the news transmitted through salt water will be fresh.

Why are potatoes and corn like certain sinners of old? Because, having eyes they see not, and having ears they hear not.

An old man and his son, neither of them very well informed as to railroads and their uses, chanced one day to be at work in a field near a railroad track. Railroads were a novel “institution” to them; and when a train of cars shot by, a thought was suggested to the lad, who said to his parent, “Dad, why don't you take a ride in the cars some day?”—“Take a ride in the cars? Why, I hain't got time, my son.”—“Got time! Thunder! you can go any where in the cars quicker than you can stay at home!” Dad's reply is not on record.

Why is a lover, cloping with his lady love, like a vessel sailing to a certain port in France? Because he is bound to have her, (Havre.)

Why was Cowper always in debt? Because he “O'd” for a lodge in some vast wilderness.

Recommendations of Wistar's Balsam of Wild Cherry.

Northfield, Vt., October 18, 1855.

Messrs. Seth W. Fowle & Co. Gents.: In the winter of 1853 I was confined to the house, and part of the time to my bed, for two or three months, with a very severe cough, produced by a cold. During that time, I lost nearly forty pounds of flesh. My friends became alarmed, and some thought I was going into a decline. I was advised to try Wistar's Balsam of Wild Cherry. I got a bottle, and before it was gone I was cured. I had tried various other remedies, but got no relief until I began taking the Balsam. I can truly say I think it saved my life at that time. I would not be without it. For coughs or colds it is the best medicine I know of. Yours, truly,

S. W. PEARSON, Engineer Vt. Central R. R.

CURE OF DISEASED LIVER.

Honesdale Co., Penn., J. n. 10, 1850.

Mr. Seth W. Fowle. Sir: You are at liberty to use the following statement for the benefit of the afflicted:—

I was attacked with the liver complaint, which apparently brought me to the brink of the grave. During my sickness I was attended by three physicians in our place, but received no help. I also tried the various remedies recommended for such complaints, but they afforded me no relief. As a last resort, I was persuaded to try Wistar's Balsam of Wild Cherry, and by using four bottles I was restored to better health than I have enjoyed before for ten years. This statement may be relied upon as strictly true.

BETSEY PERRIN.

The above certificate was given in the presence of Dr. A. Strong, of Honesdale, who is well known in his vicinity as a successful practitioner.

DOMESTIC RECEIPTS, &c.

THE BEST FERTILIZER FOR HOUSE PLANTS is common glue diluted with water. An ounce of glue is sufficient for a gallon of water.

A WATER-PROOF MIXTURE FOR LEATHER.

—Take one pint of tanner's oil, half pound of tallow, a lump of good rosin the size of a common shell-hark, Burgundy pitch size of a hen's egg, lamblack three cents' worth; mix together, and melt gradually over a slow fire. When to be applied, the mixture should be made about milk warm, and put on with a clean sponge; the leather may be made a little damp, not wet. The above cement, when applied to boots and shoes, will effectually prevent their soaking water, and keep the leather pliant and the feet of the wearer warm and dry. Every farmer who regards comfort as a desideratum should supply himself with this article, and apply it to his boots and shoes. —*Germanstown Telegraph.*

SALERATUS.—Dr. Alcott pronounces saleratus excessively injurious to the human system. After relating an instance of very dangerous disease induced by the use of saleratus,—causing muscular prostration, loss of the tone of the bowels, and immediate mortification wherever a blister was applied,—the doctor makes the following startling declaration: There can be no doubt that the subinflammation of the alimentary canal, which the habitual use of this alkali induces, both in children and adults, is one cause of that dread mortality which prevails among the former, but which, in summer and autumn, when other causes cooperate, proves peculiarly alarming.

A CURE FOR RHEUMATISM.—Lemon juice is recommended as a certain cure for acute rheumatism. It is given in quantities of a table-spoonful to twice the quantity of cold water, with sugar, every hour. The effect of the lemon juice was almost instantaneous in one case mentioned; in ten days the worst case was cured, and in seven the other was able to go out; and

there was a flexibility of the joints of the cured quite unusual in recovery after other modes of treatment.

STARCH POLISH.—When common starch is boiling, if it is stirred two or three times with a sperm candle, it will impart a gloss to linen.

DRIED PEACHES.—Peaches, as usually dried, are a very good fruit, but can be made vastly better if treated the right way. Last season, the recipes, which had quite a circulation in the papers, of drying the fruit by a stove after halving it, and sprinkling a little sugar into the cavity left by the extracted pits, was tried in our family. The fruit was found to be most excellent—better, to the taste of nine out of ten persons, than any other peach preserves, by far. The peaches, however, were good ones before drying; for it is doubtful whether poor fruit can be made good by that process or any other.

TO CEMENT BROKEN CHINA.—Beat lime into the most impalpable powder, sift it through fine muslin; then tie some into a thin muslin; put on the edges of the broken china some white of egg, then dust some lime quickly on the same, and unite them exactly.

PINK CHAMPAGNE.—Boil nine pounds of lump sugar in three gallons of water for half an hour; skim it well, and pour the liquor boiling hot over a gallon of red and white currants, picked, but not bruised. When nearly cold, put in a small teacupful of yeast. Keep it working for two days; then strain it through a horse-hair sieve, put it into a small cask with half an ounce of isinglass well bruised. Have rather more liquor than will fill the cask, to fill it up as it works over. In about a fortnight, bottle it up. Let it stand till April; put into each bottle a lump of double-refined sugar. Let the bottles remain one day uncorked. Cork and wire them; they must stand upright in the cellar. When wanted, put a few on their sides for about a week.

GENTLE FANNY RAE.

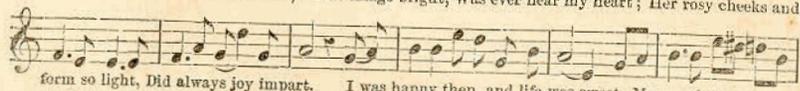

WORDS AND MUSIC

BY T. PAINE,

Author of "The Old Cabin Home."

1. I'd a treasure once, whose image bright, Was ever near my heart; Her rosy cheeks and

form so light, Did always joy impart. I was happy then, and life was sweet, My mood was always

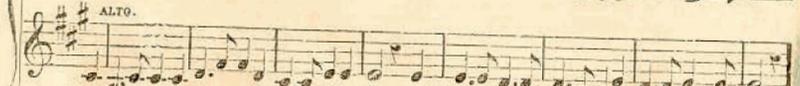

gay, My tale of love I'd oft re-peat, To gen-tle Fan-ny Rae.

CHORUS.

SOPRANO.

ALTO.

That lovely maid in death doth sleep, And they who knew her often weep,
She's in the cold, cold grave; For gentle Fanny Rae.

TENOR.

BASS.

2
She oft did roam at early dawn,
O'er valley, hill and plain;
Her step was like the gentle fawn's,
And cherish'd was her name.
Her voice was ever soft and clear,
Her songs were always gay,
I never can forget my dear
My gentle Fanny Rae.
Cro.—That lovely maid &c.

3
But I soon was called to see her die,
That maid so blithe and gay;
I took her hand and bid good bye
That soul had pass'd away.
I'm lonely now, I've nought but woe,
I weep from day to day;
And when death calls I'll gladly go
To gentle Fanny Rae.
Cro.—That lovely maid &c.

OXYGENATED BITTERS

— IS —

THE ONLY SURE AND SAFE REMEDY EVER DISCOVERED
FOR THE CURE OF
DYSPEPSIA,
IN ALL ITS VARIOUS FORMS.

The present Proprietors of the OXYGENATED BITTERS will hereafter supply all demands for the same, at the old stand of **SETH W. FOWLE, 138 WASHINGTON STREET,** the well known *Head Quarters of Wistar's Balsam of Wild Cherry.*

Nearly all of our best physicians acknowledge the merits of this truly great Remedy, while only those of second and third rate ability can be found, who, through envy, would detract from its well-earned reputation. These BITTERS are the production of a thoroughly educated and well known physician, and are the result of long and careful study on his part to obtain relief for an invalid wife, who had suffered for many years as none but the confirmed dyspeptic can suffer. His efforts were crowned with success, and thousands are now living who gratefully acknowledge that they owe their lives and comfort to this most valuable discovery. It was only at the earnest solicitation of influential friends, who had seen and felt the beneficial effects of these Bitters, that the doctor was induced to give them in this form to the public.

SETH W. FOWLE & CO.

BOSTON, MASSACHUSETTS,

PROPRIETORS OF

Wistar's Balsam of Wild Cherry,

— AND —

GREENE'S OXYGENATED BITTERS.

All orders for Agencies must be accompanied by suitable references,
AND WILL RECEIVE PROMPT ATTENTION.

Our Medicines will be found on sale in nearly every town and city in the British Provinces, Canadas, New England States, New York, New Jersey, Pennsylvania, Delaware, Maryland, Virginia, Carolinas, Georgia, Florida, California, and many other States.

SPECIAL NOTICE!

Purchase no Medicine purporting to be "WISTAR'S BALSAM OF WILD CHERRY," unless it has the Written Signature of "I. BUTTS" on the Wrapper: none else is Genuine; all else is Spurious, Worthless, and Deleterious.
