

# NLM Office Hours

## *MeSH Listening Session*

June 30, 2022

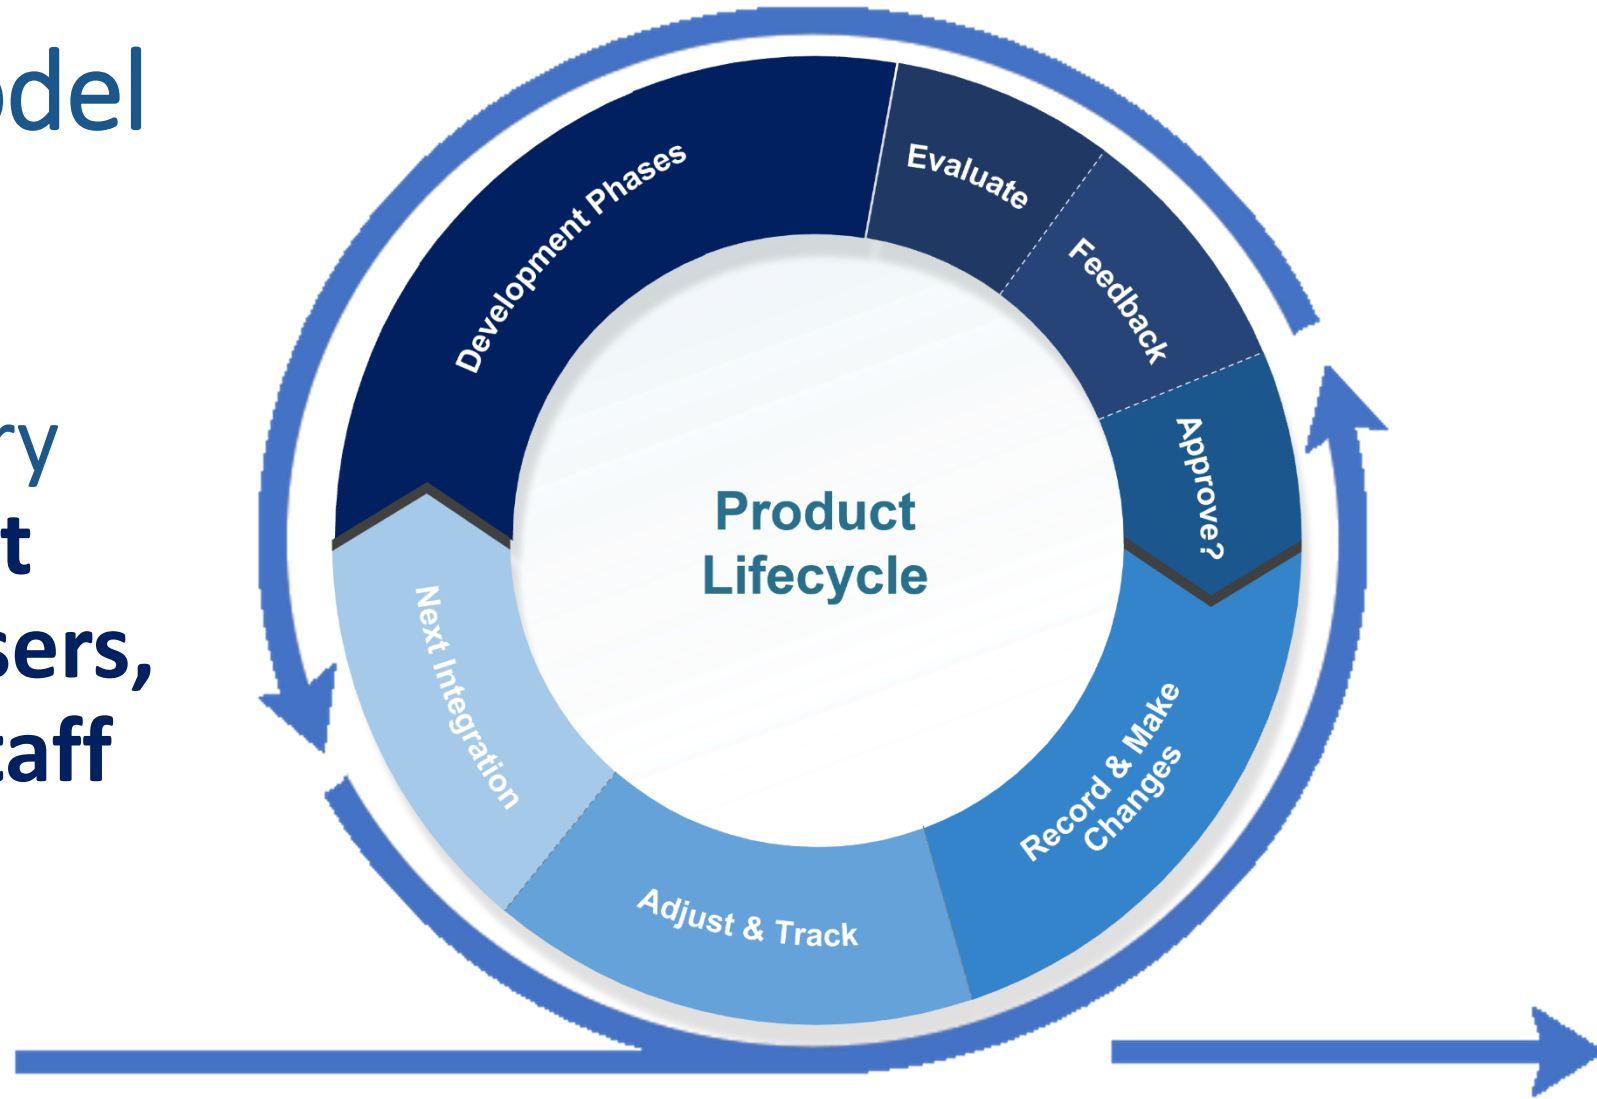

# Agenda

- Welcome
- MeSH Product Life Cycle
- Proposed Changes
- Open Forum: Listening to Your Thoughts & Ideas

# Our Product Model

Using data and incremental delivery to provide the **best experience for our users, stakeholders, and staff**

# MeSH Components

- **30,194 Descriptors** covering topics, publication types, check tags, and geographic regions
- **318,184 SCRs** covering protocols, chemicals, diseases and organisms
- **Subheadings** or "qualifiers"

# Component Update Cycles

- Descriptors (MH) and sub-headings (SH) are updated or released **annually** every fall.
- Supplementary Concept Record (SCRs) are created **daily** and distributed nightly Monday-Thursday.
- Users can access MeSH data through Web interfaces or receive downloadable data sets in XML, ASCII, MARC 21, and RDF from the NLM Data Distribution Program.

# Review Process Principle

- NLM receives approximately **700 submissions** annually.
- **Seven review meetings** are scheduled throughout the annual MeSH production cycle.
- This process includes review of feedback and requests from internal and external stakeholders through MeSH suggestions
- Each MeSH request is assigned to a staff member who drafts recommendations for review by the MeSH Section.

# Review Process Principle

- Where there are gaps in knowledge, NLM engages across NIH/other federal agencies.
- The MeSH Section then determines whether to add or modify MeSH vocabulary based on various factors.
- Decision-making during review meetings is consensus-based.
- Updates are made via the MeSH webpage and the NLM Technical Bulletin.

# Please continue to provide feedback!

## User Suggestions for Medical Subject Headings

### *Your Feedback is Welcome!*

The [NLM Customer Support Center](#) provides a variety of help topics on NLM products. You can also select the [Write to the help desk](#) button to submit a request for a change or addition to MeSH vocabulary. Please review the guidelines below to ensure that your request is processed correctly.

MeSH vocabulary suggestions are reviewed for literary warrant and other criteria of usefulness, for reproducibility in use, and for understandability. Our mission is to produce a clear and concise vocabulary that is useful for indexing and retrieval of biomedical literature. Each entry term expression in MeSH is unique and carefully chosen to avoid expressions that are multimeaning. Although MeSH works closely with a variety of NLM departments that provide indexing, citation data, and publications we are not directly involved in these processes and cannot provide answers for questions related to these areas.

Please put “MeSH Listening Sessions” in the Subject Line.
