ClinicalTrials.gov

ClinicalTrials.gov is the world's largest database of privately and publicly funded clinical studies conducted in the U.S. and around the world.

A clinical study involves research using human volunteers (also called participants) that is intended to add to medical knowledge.

Anyone can use ClinicalTrials.gov to:

- Find information about a study or help someone find a study
- See results of completed studies
- Learn how clinical research works

Researchers can use ClinicalTrials.gov to:

- Share up-to-date information about their clinical research
- Download and analyze study record information
- Discover the research landscape

The ClinicalTrials.gov website was modernized in June 2023 to serve you better.
Check out the website at **www.ClinicalTrials.gov** and let us know what you think.

 NIH National Library of Medicine

Information on ClinicalTrials.gov is provided by the sponsor or investigator of the study.
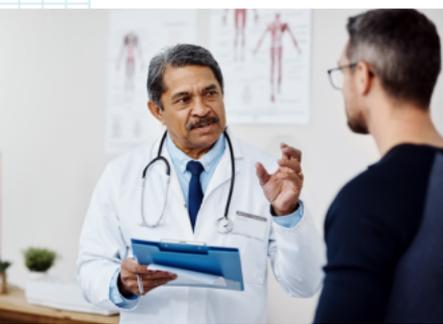

Each ClinicalTrials.gov study record includes details on:

- What is being studied
- Who can participate in the study
- Where the study is being conducted
- Who to contact with questions about a study

Listing a study does not mean it has been evaluated by the U.S. Federal Government.

Before participating in a study, talk to your health care provider and learn about the risks and potential benefits.

ClinicalTrials.gov provides the public with access to standardized, up-to-date information from sponsors and investigators about their ongoing and completed clinical trials and results.

ClinicalTrials.gov is a resource provided by the National Library of Medicine (NLM), part of the National Institutes of Health (NIH).
