APPENDIX A.1

Appendix to the License Agreement for Use of the UMLS Knowledge Sources

UMLS METATHESAURUS SOURCE VOCABULARIES -- January 2003AA Edition

Sources are listed in order according to the abbreviations used in the UMLS Metathesaurus files. If additional restrictions and notices apply, the category of restrictions and the special notices appear under the name of the source. See the license agreement for an explanation of the categories of restrictions. Many sources publish printed editions and/or other explanatory information that may be essential to understanding the purpose and application of particular sources in data creation and retrieval. Contact information is provided for each source. Please address questions about permissions or license agreements for additional uses not covered by this Agreement, or other inquiries about individual sources, to the appropriate contacts.

NLM is working toward inclusion in the UMLS Metathesaurus of the complete, current edition of most of these vocabulary sources.

The fully specified names were produced with reasonable care, but have not yet been reviewed and approved by the producers of ICD-9-CM.
